Electrolux PROFESSIONAL

Designed for one business standard. The highest one.

myPRO

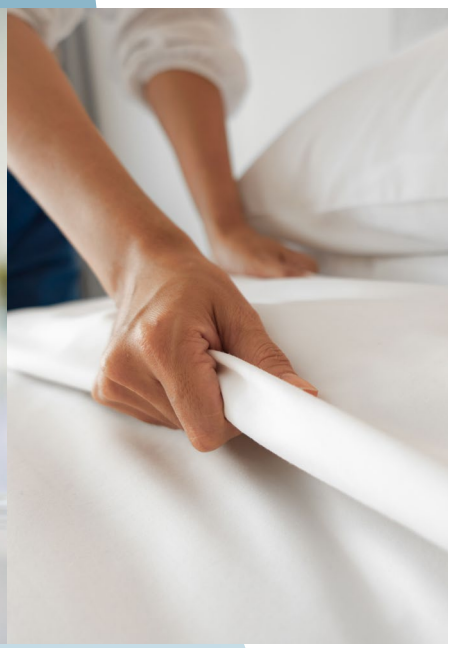
Taking care of business

Built for repeated daily use where standards cannot slip

myPRO is the Electrolux Professional solution for businesses where laundry is part of the working life. Combining professional washers, dryers and steam ironers, myPRO keeps operations running smoothly day after day.

Performance that your business can depend on.

From guest towels and tablecloths to care textiles, uniforms, mops and fitness towels, myPRO helps businesses keep laundry moving with less effort, more control and to a standard your customers appreciate.



The beating heart of your daily laundry

myPRO Range

Performance that your business can depend on every day.

From self-service facilities to steady daily demands and higher-volume operations, myPRO offers a professional solution for every workflow.

myPRO *Edge* delivers dependable performance for everyday business use.

myPRO *Go* provides a simple, guest-friendly solution for self-service facilities.

myPRO^{XL} is designed for larger loads and greater demand.

myPRO Steam Ironers help businesses achieve professional finishing results faster and with less effort.

Together, they provide the reliability, efficiency and durability businesses need to keep textiles clean and customer-ready.

Which is the right myPRO solution for you?

		Recommended for	Wash cycles per day	Lifetime operating cycles / hrs	Load capacity (kg)
	myPRO *Edge* For businesses with steady daily laundry needs	Hair and beauty salons, B&Bs, hospitality, cafés, restaurants, kindergartens, care homes, veterinary practices, sports clubs	1-4	Up to 15,500 operating hours	9 (washer and dryer)
	myPRO *Go* For businesses with self-service facilities	B&Bs, small hotels, out-of-home resident services, camping, marina, student houses, military bases, holiday parks	1-4	Up to 15,500 operating hours	9 washer / 8 dryer
	myPROXL For businesses with bulkier laundry needs	Hair and beauty salons, B&Bs, hospitality, cafés, restaurants, care homes, kindergartens, veterinary practices, sports clubs	1-7	Up to 15,000 cycles	12 (washer and dryer)

It's not domestic for a reason – it's designed to take care of business

Domestic machines can look like the lower-cost choice. But when laundry is part of the working day, you need a machine built for regular use, faster turnover, better hygiene and business-ready support.

Our commercial warranties give complete peace of mind. They are reassuringly designed for professional applications – because business use is different from household use.

Why choose myPRO over domestic machines

Lifespan and durability

Lasts 3x longer*

myPRO *Edge* and **myPRO** *Go* are tested for 15,500 operating hours, up to 3 times longer than a typical domestic machine. **myPRO**XL is tested for 15,000 cycles.

Professional-grade quality

Bearings, sealing and robust construction are engineered for repeated daily cycles, meaning better reliability and lower overall costs.

*Compared to domestic machines

Professional reliability

Made for business textiles

Professional programs, including Hygiene and ProSteam Boost for steam refresh, help handle towels, cloths, uniforms, mops and other daily business loads.

Commercial warranty

Our commercial warranty is designed for business use – something domestic machines cannot match.

6 in 1

1 myPRO *Edge* **and** *Go* **washer can handle the work of up to 6 domestic machines, delivering up to 3 times longer service life and wash cycles up to twice as fast.**

Smooth operations

Clear interface logic

myPRO *Edge* and **myPRO**XL offer extra business options but are still easy for teams to understand. The self-service **myPRO** *Go* is even simpler, with just 2 buttons.

Trouble-free operation

Easy to install, with a plug-and-play design, **myPRO** *Edge*, *Go* and *XL* washers come with pump drain as standard, helping businesses get to work straight away.

For demanding environments with access to a floor drain, such as facilities management and care settings, flexible plug-and-play installation options are available, including pump or gravity valve configurations.

The gravity valve releases water instantly for faster, reliable draining that supports high hygiene and efficiency standards. With fewer moving parts, it offers better durability and dependable performance, day after day.

Productivity

Up to 50% faster* washer cycles

The Cotton 60°C program runs in just 82 minutes with a cold water supply at 15°C, helping businesses keep laundry moving efficiently throughout the day.

The pre-installed hot inlet means the machine doesn't need to do all the heating itself, reducing cycle times by a further 17 minutes and lowering energy use.

*Compared to domestic machines

myPRO *Edge*

A sharper, more focused business laundry solution.

A complete washer and dryer solution for businesses, with steady daily laundry demands of up to 4 cycles a day, that depend on clean, ready-to-use textiles every day.

myPRO *Edge*

myPRO *Edge*

A business laundry focused machine in a space-efficient format – designed to make the difference day after day.

x3 longer life

Tested for 15,500 operating hours – up to 3 times longer than a domestic machine.

Lifespan and durability

The new 9kg capacity

myPRO *Edge* gives you 9kg capacity in a space-efficient footprint. Ideal for businesses with limited room, steady daily laundry demands of up to 4 cycles per day and varying load types.

> More productivity – not more space

> Fewer loads save time across the day

15,500 hours

myPRO *Edge* is engineered for multiple cycles a day, with professional-grade components built for business use. It is tested for 15,500 operating hours – up to 3 times longer than a typical domestic machine.

Built for repeated daily use up to 4 cycles a day
Keeps performing under business demands.

More durable components
Commercial-grade materials and robust construction mean a longer working life.

> Longer life – better value over time

Stainless-steel face

Superb hygiene with corrosion-proof bicolor exterior and easy-to-clean stainless-steel top and front. Your machine is smart, durable and reflects professional business standards.

> Fast and easy to clean

> Corrosion-proof for durability

Stackable

Space-efficient by design. The washer and dryer can be stacked to maximize floor space for an efficient laundry set-up. Do more without needing more space.

> Perfect for small-footprint spaces

> Stackable for efficient use of space

myPRO *Edge*

WASHERS

Productivity and savings

Up to 50% faster* washer cycles

Designed to keep daily operations running smoothly, the Cotton 60°C cycle completes in a fast 82 minutes when connected to a 15°C cold water supply. For even greater efficiency, the machine has an built-in hot inlet so the washer can spend less time heating. This takes another 17 minutes off the running time and cuts energy use.

> **Faster operation for quick turnarounds**

> **Makes use of existing hot water supply**

Energy class A efficiency

The **myPRO** *Edge* washer delivers exceptional energy performance for a machine built with a durable, stainless-steel structure. It helps businesses reduce running costs without compromising on professional results.

Save energy on every cycle
Washes effectively while keeping energy use lower – 50% of energy and water savings per cycle vs domestic machine with A energy class.**

> **Lower energy for lower operating costs**

> **Better efficiency for maximum output**

Pre-installed hot and cold inlets

Delivers faster cycles, more efficient business washing and lower energy use. The hot water inlet cuts 17 minutes from the overall cycle time, leading to cycles up to 50% shorter. Perfect for environments where every moment counts, such as vet practices and clinics.

Hot water inlet shortens heating time
When hot water is available, the machine can use that.

> **Faster cycles, faster turnaround**
Having a pre-installed hot inlet means less time heating water.

> **More suitable for demanding business environments**

The Speed Soak Drum

The **myPRO** *Edge* washer Speed Soak Drum is designed to wash more efficiently and extract more water before drying. Faster cycles, cleaner results, shorter drying times and lower energy use. Suitable for all businesses, especially those with increased laundry needs or a self-service offer.

Better cleaning, faster drying
Standard domestic machines have 2.5/3mm perforations. Our 4.5mm design cuts wash and dry times. Water soaks the load faster, then drains more completely to reduce drying time. Dirt and particles are thoroughly washed out rather than trapped, ensuring the pristine, hygienic results demanded by clinics and salons.

Gentler on textiles
Faster soaking and smart drum design both reduce abrasion, so towels, sheets and workwear look and feel good for longer. An advantage for facilities management and hospitality businesses.

> **Faster turnaround**

> **Better hygiene and cleaner results**

> **Lower running costs**

> **Better care of business textiles**

*Compared to domestic machines
**Based on 60°C cotton program

A calm, quiet workplace

Less vibration and noise*

The **myPRO** *Edge* washer has a shock-absorption system and balanced components that minimize vibration and noise. Working below 50dB during the wash cycle, it supports a comfortable working environment without compromising on performance.

> **Creates less noise in the workplace**

> **Minimal vibrations for a calmer environment**

Ergonomic design

Designed for ease of use, the **myPRO** *Edge* washer features a clear, intuitive interface with inner drum lighting, a robust program selection knob, a conveniently positioned start button and easy-to-pull handle. The pedestal makes loading and unloading more comfortable, while the washer and dryer can be stacked to maximize floor space for an efficient laundry set-up.

> **Fast and easy to load and unload**

> **Stackable for efficient use of space**

50%

more efficient

Efficiently created with businesses in mind, the myPRO *Edge* range delivers 50% energy savings compared with domestic machines. Clever design means wash programs run up to 50% faster to keep your business operating smoothly.

myPRO *Edge*

WASHERS

Professional programs

16+6 professional programs

The 16+6 professional programs are designed for business textiles and daily business use, not generic household laundry.

Focused on the way businesses work
Specialist programs handle everything from towels to mops and team kits. The high temperature program is great for tackling stubborn marks. A professional choice for hospitality, fitness, veterinary, healthcare, nursery care, or facilities management businesses.

> **The right result for the right load**

> **Improved disinfection program for hygiene-critical environments**

> **Adds flexibility that domestic machines can't match**

Disinfection program

Uses an optimized water ratio, so textiles move more freely in the drum for better soil removal and disinfection.

Strengthens hygiene performance
Because textiles have more room to move, water and detergent reach more of the fabric, removing bacteria, pathogens, viruses and chemical residue.

Ideal for hygiene-critical environments such healthcare, nursery care, beauty, fitness, veterinary, hospitality and facilities management - businesses where cleanliness is crucial for reputation and service.

> **More confidence in cleanliness**

> **Remove bacteria and chemical residue**

ProSteam Boost

Our 15 to 25-minute professional steam refresh function for textiles of up to 1kg per load.

A quick steam refresh
Ideal for garments or textiles that are not heavily soiled but need to feel fresh, odor-free and ready to use again. Perfect for hospitality, clinics, healthcare or uniformed businesses. Saves time across the working day and saves resources with no detergent and very low water consumption.

> **Reduces wrinkles for easy finishing**

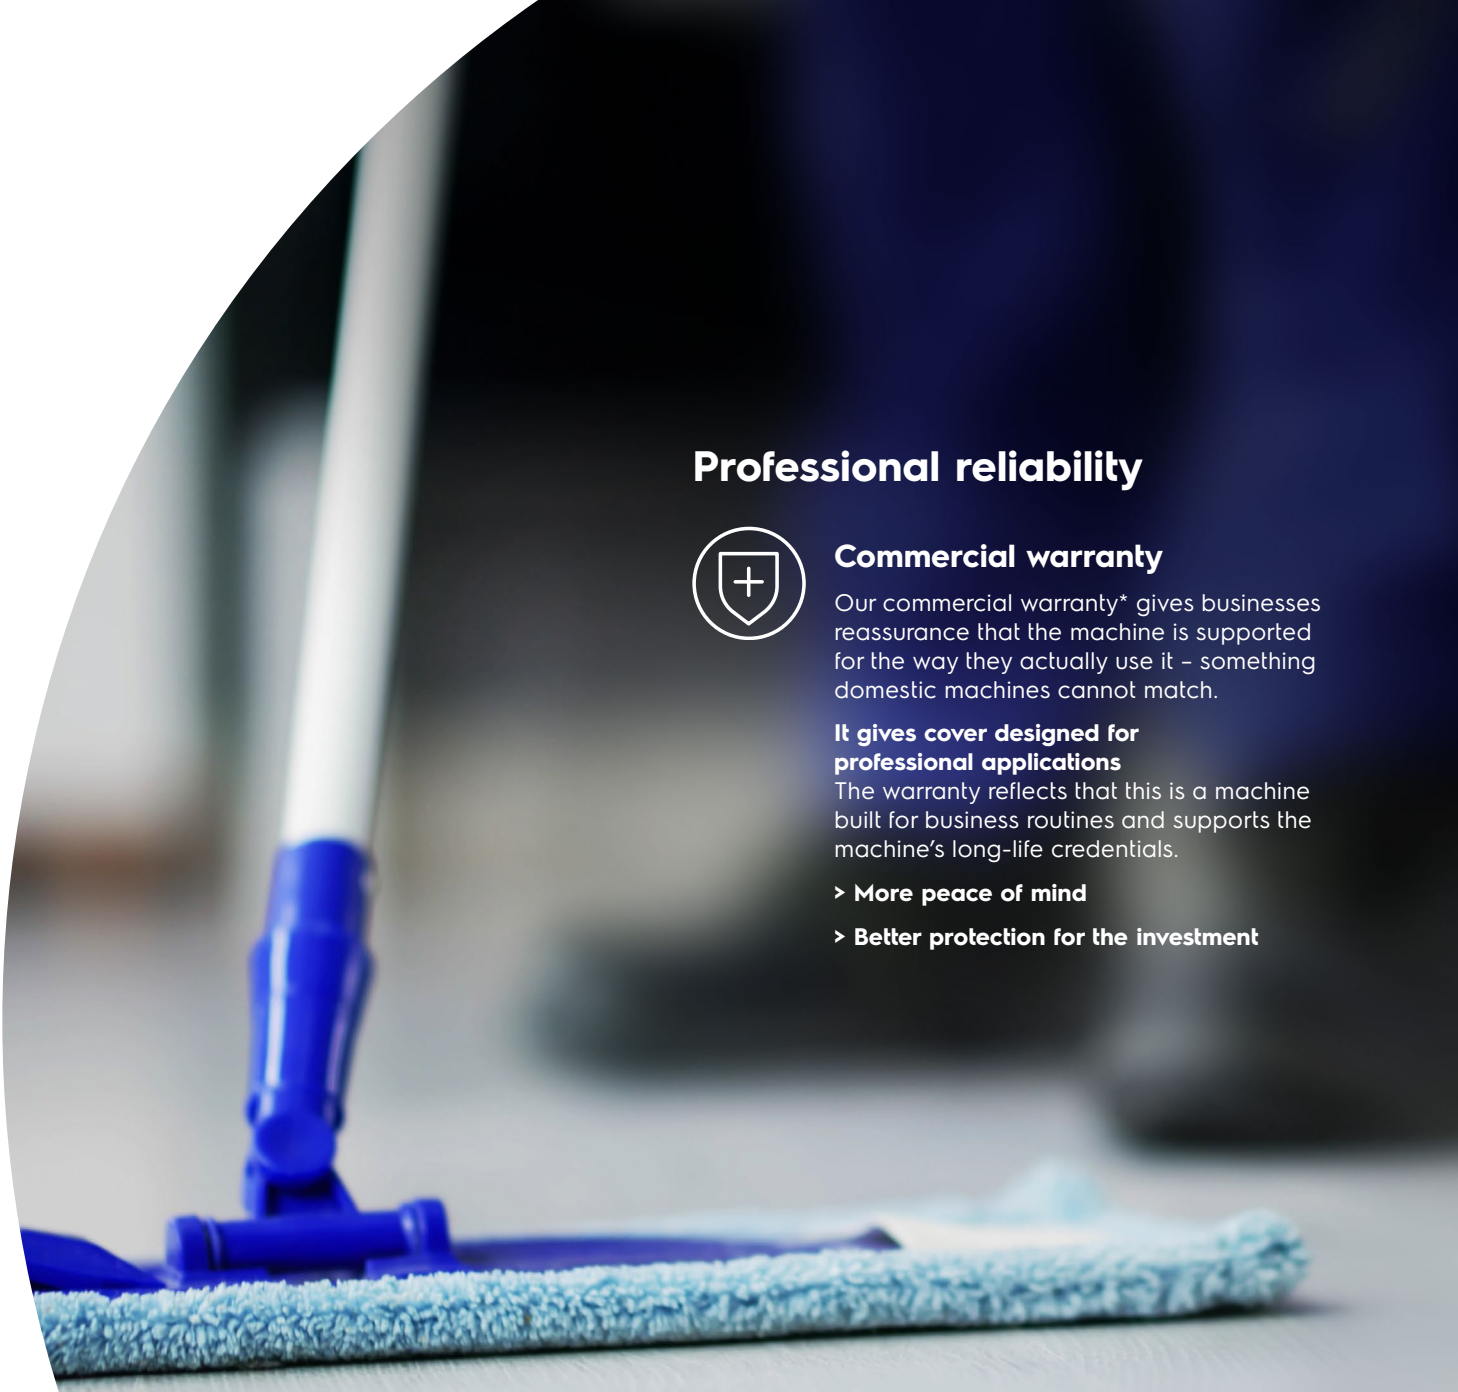
> **Gentle on fabrics**

Mop program

The mop program deep cleans and preserves microfiber efficiency, so mops work better for longer. Engineered for frequent daily use and professional high standards, it delivers reliable results, reduces textile replacement costs, and it keeps workplaces consistently clean and compliant. An ideal choice for facilities management, restaurants and B&Bs.

> **Efficient cycles for professional results**

> **Prolong the life of mops and microfiber**



Professional reliability

Commercial warranty

Our commercial warranty* gives businesses reassurance that the machine is supported for the way they actually use it – something domestic machines cannot match.

It gives cover designed for professional applications
The warranty reflects that this is a machine built for business routines and supports the machine's long-life credentials.

> **More peace of mind**

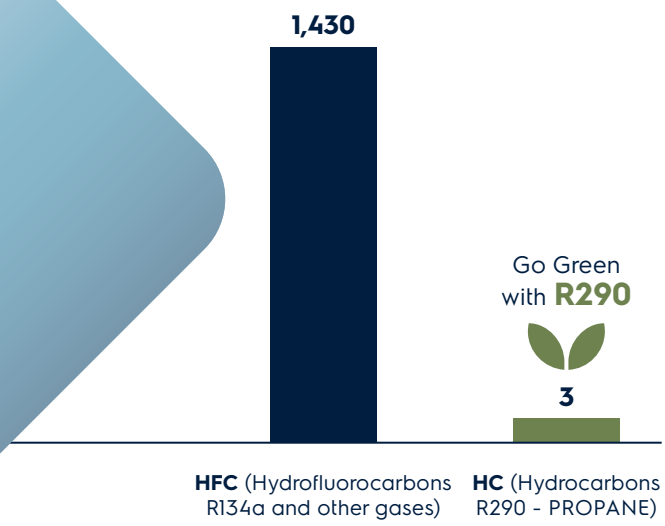
> **Better protection for the investment**

Steam fresh in 15

ProSteam Boost is a 15 to 25-minute steam-only program for lightly worn textiles of up to 1kg per load. Textiles have zero contact with water, but feel, look and smell refreshed.

myPRO *Edge*

R290 refrigerants in myPRO *Edge* dryers reduce CO_2 emissions by 99.8%



Cost savings and the environment

R290 refrigerant

myPRO *Edge* uses R290, a refrigerant with a much lower environmental impact than commonly used alternatives such as R134a. And when compared, it helps the dryer reduce CO_2 emissions by 99.8%.

It improves the machine's environmental performance
The dryer uses a more sustainable and environmentally friendly refrigerant but doesn't change the practical ease of use for the business.

It helps future-proof the solution
Useful for businesses with low-carbon targets and sustainability expectations.

> **A more responsible drying solution**

> **Supports sustainability goals**

Heat pump technology

Our heat pump technology uses significantly less energy than a condenser dryer. It can reduce energy consumption by up to 60% compared with condenser dryers. And delivers reliable drying results for businesses day after day.

It dries more efficiently
The dryer uses heat pump technology, guaranteeing constant and reliable performance as it depends less on room temperature, whilst reducing energy demand.

It helps lower the cost of drying
Heat pump technology recovers and reuses heat during the drying process. This reduces energy consumption and lowers running costs.

It supports a smarter wash-to-dry workflow
Especially when paired with low-moisture loads from the washer. A great choice for businesses with fast laundry turnarounds, such as hospitality and salons.

> **Lower energy use means lower running costs**

Residual moisture control

Residual moisture control stops drying at the right point, so loads reach the right dryness level more accurately and consistently. **It decreases residual moisture by 52%** after the end of the cycle, helps protect textiles and reduces unnecessary energy use.

It measures how dry the load is
The dryer responds to the real moisture level in the load.

It helps stop over-drying
Loads do not keep drying longer than necessary.

It gives more precise results every cycle
Useful when consistency matters across repeated daily loads.

> **More consistent drying results**

> **Better textile care**

> **Lower energy waste**

60%

less energy use

Business owners looking to keep energy costs down will appreciate our heat pump technology. It consumes much less energy than a condenser dryer and reduces energy use by up to 60%. Lowering bills, contributing to sustainability goals and delivering reliable drying, day after day.

myPRO *Edge*

DRYERS

Professional outcome

Reverse Plus drum action

Reverse Plus changes the drum direction more effectively during drying, helping larger and longer items move more evenly through the dryer. That means less tangling and more even drying – saving precious time and energy.

It helps the load move more evenly in the drum
This action ensures items are less likely to bunch up or twist together – reducing tangling. Especially useful for longer or bulkier items.

It helps improve drying consistency across the load
So businesses get a more even result. Ideal for hospitality, healthcare and wellness businesses.

Less time dealing with tangled loads
Helps reduce interruptions and rework.

> **More even drying means more predictable results**

> **A smoother daily drying workflow**

Serviceability

Improved dryer serviceability

myPRO *Edge* dryers are designed to be easier to maintain, with simplified service access and a filter brush included to help keep things running smoothly.

It makes routine maintenance easier
Simple upkeep helps the machine stay in good working order.

It supports smoother day-to-day operation
The included filter brush helps users keep the dryer clean and efficient.

It reduces hassle for the team using it
Maintenance is simpler and more manageable.

> **Less downtime risk**

> **Simpler upkeep for busy teams**

> **Helps protect long-term performance**

myPRO^{XL}

Professional performance that goes further with practical features and dependable results.

From dedicated disinfection programs to flexible installation and service-friendly design, myPRO^{XL} is built to support smooth day-to-day operations. Professional programs help deliver consistent results across a wide range of textiles, while practical features make laundry easier to manage from start to finish.

Designed for daily operations

Ergonomic design

Front-service access and practical design features help simplify maintenance and support long-term performance.

> **Straightforward to maintain**

> **Easy and fast to load**

Professional durability

Professional-grade construction and components minimize disruption for smooth daily operations. Stainless-steel drum, 8-point spring suspension, heavy duty bearings, cast iron housing and triple seals combine for superb durability. A great choice for businesses with larger laundry loads, such as hospitality, beauty, wellness and healthcare.

> **Built for daily business needs**

> **Robust and durable**

Adaptable set up

Flexible installation configurations

Flexible installation configurations make it easy to tailor **myPRO**XL to your operation. Perfect for businesses where space is at a premium, such as salons, care and staff accommodation.

> **Make the most of your space**

> **Stackable or side-by-side**

Self-service solution

Payment solutions are available (for both stacked and single configurations) and promotional pricing capabilities help support revenue-generating laundry facilities. Card or electronic payments can also be added using third party platforms.

> **Flexible payment systems**

> **Supports revenue generation**

Productivity and lifetime

Bigger loads. Greater productivity.

A larger 12kg capacity helps businesses process more laundry in fewer cycles, supporting a faster and more efficient workflow.

> **Spacious drum for bulky items/larger loads**

> **Consistent wash quality and performance**

15,000 cycles

Engineered for 15,000 cycles, **myPRO**XL is designed to deliver dependable performance day after day.

> **Designed for high standards**

> **Dependable performance over time**

myPRO XL

WASHERS

Productivity and savings

High-speed extraction

High-speed extraction removes more water from textiles, reducing drying times, laundry turnaround and energy use. Perfect for fast-moving businesses, such as hospitality and healthcare.

> **Reduces drying time**

> **Lowers energy use**

Water savings

Because water levels are fully adjustable, you save water and the associated costs.

> **Better for the environment**

> **Brings down costs**

Professional outcome

Disinfection programs

Dedicated washer disinfection programs help support high standards of cleanliness, giving businesses added confidence in every load. Perfect for care environment, nurseries and clinics.

> **Washes cleaner for pristine results**

> **Supports high hygiene standards**

Professional programs

Professional wash and dry programs are designed to deliver reliable textile care and dependable results across a wide range of fabrics.

> **Programs designed for business needs**

> **Perfect for a range of textiles**

Lower vibrations, less noise

Shock absorbance system

Highly effective shock absorbance system and optimally balanced components and paneling resulting in below 62dB in the washing process.

> **Quieter operation during spin cycles**

> **Reduced stress on internal parts**

Quiet zone

Reduced noise means a better working environment for teams – and less sound leakage into customer areas. Operating below 62dB during the washing cycle, myPRO^{XL} is the perfect choice for a busy, but calm, workplace.

myPRO Steam Ironers

Combining steam performance, flexible control and space-efficient design, myPRO Steam Ironers **keep textiles looking their best and support the high standards your business depends on.**

Stainless-steel worktops

Professional-grade construction with a stainless-steel worktop and durable components tested for a minimum of 2,000 operating hours.

> **Tested for performance**

> **Robust and durable**

Flexible finishing for a wide range of textiles

With 5 temperature settings and a large tank for continuous use, this option accommodates bulkier items up to 2.5cm thick.

> **Foot pedal operated roller speed**

> **Mobile design for flexibility**

Trouble-free operation

Designed with professional use in mind.

> **Plug-and-play installation**

> **Easy-fill water tank can be topped up during use[1]**

Steam functions

3 steam settings with continuous or on-demand steam.

> **Removes creases faster than dry ironing**

> **Improves textile presentation and reduces finishing time**

Variable speed

Variable speed controlled by foot pedal. Designed for busy professional environments.

> **Operates at speeds of 72-204m per hour**

Faster and easier processes*

Designed to save time and simplify daily ironing compared with hand ironing.

> **For demanding professional environments**

> **Superb results every time**

IS185 - space-saving thanks to foldable top

85cm roller

IS1103 - larger roller for maximum productivity

103cm roller

*Compared to domestic machines

Excellence
with the environment in mind

- The majority of Electrolux Professional Group factories are third-party certified according to ISO (International Organization for Standardization) standards ISO 9001 and ISO 14001, with some sites also certified ISO 50001 and ISO 45001.*
- We are focused on developing innovative and sustainable solutions designed for low water, energy and detergent consumptions and reduced emissions.
- Our products are tailored to human comfort based on ergonomic principles and according to the user's natural workflow, achieving maximum efficiency with minimum effort. We also perform third-party ergonomic certifications on certain products (ERGOCERT).
- The selection of materials and technologies for our products complies with REACH (Registration, Evaluation, Authorization and Restriction of Chemicals) and RoHS directives (Restriction of Hazardous Substances 2011/65/EU) for the protection of human health and the environment.
