TANGO XP

# TANGO XP

Designed for performance, the super automatic TANGO XP series promises an unrivalled experience to coffee professionals with high expectations in coffee extraction quality, and high standards in facilitating and optimizing functionality and user's daily operational activities.

# EXCELLENCE IN THE CUP

## Espresso at our core

UNIC's heritage and long expertise in espresso technology performs in the legendary patented TANGO® brew group. This unique full metal piece is designed to replicate all the traditional operations achieved by an expert barista, ensuring a unique coffee extraction quality with replicable results and consistency.

Customize your drinks menu by choosing between hot or cold milk, as well as foamed milk. Our exclusive milk system provides an excellent solution for storing and dispensing fresh milk directly from the TANGO XP fridge unit, complete with a removable 9-liter container.

## Performance beyond expectations

Handling high coffee volumes require an even best-in class performing coffee maker. The high precision 83mm flat burrs grinders are the guardian of always fresh coffee ground with high consistency and fast delivery. The TANGO XP Duo is committed to deliver 440 espresso cups per hour, operating simultaneously the two separate groups, with always the same taste and consistency.

# A FULL NEW EXPERIENCE

## Intuitive use

TANGO XP user-friendly 10" screen interface provides a clear intuitive menu to engage the different profiles operators in a full experience on coffee and milk parameters settings to tailor a specific drinks menu.

## Designed for efficiency

Special attention has been paid in term of design to facilitate machine serviceability, in order to reduce time and maintenance costs. With its fixed semi-module blocks structure, the TANGO XP has limited frictions when operating, which is key to durability for all internal components.

## Technical features

	Tango XP Solo	Tango XP Duo	Tango XP Fridge
