

Horizontal cooking

One expert in every harbour

Pressure Braising,
Braising and Boiling Pans

Since 1871

Production, Precision and Tradition for over 150 years

Swiss Design delivered around the world from a world class factory based in Switzerland. Made for your Excellence

Boiling pans line 1930

First generation of tilting boiling pans 1934

Cooking installation in Kloster 1960

A strong passion for innovation, special attention to customers, and a genuine belief in sustainability are the core values that inspire Electrolux Professional and support its vision.

A story dating back to 1871 continues today with Electrolux Professional's Swiss-designed products, closely linked to the *thermaline* product family, a global player in the market. *thermaline* offers state-of-the-art technology, high quality, innovative design, and easy-to-use appliances, drawing on over a hundred years of expertise.

thermaline ProThermetic

The exclusive range includes tilting Pressure Braising Pans, Braising Pans, and Boiling Pans in **various sizes**, each coming standard with a **variety of accessories**.

This offers multiple benefits and features. All models are equipped with Marine flanged feet and a rear closing panel, ensuring **safety** and **stability** for marine installations.

ProThermetic Braising Pans

Reliability and flexibility all in one. The *thermaline* ProThermetic range offers the best solution for high productivity kitchens.

The *thermaline* Pressure Braising Pans and Braising Pans can operate as Braising Pan and Boiling Pan for the Highest Multifunctionality.

Durable and Reliable

The ProThermetic Braising Pans and Pressure Braising Pans deliver outstanding results **even in the toughest conditions.**

- ▶ Extremely robust, warp resistant and insensitive to thermal shocks, guaranteeing temperature stability with full loads of food, even with frozen products.
- ▶ Lateral surface of the vessel in DIN 1.4301/AISI 304 and bottom plate in DIN 1.4404/AISI316L for greater resistance even with acidic products.
- ▶ 33 mm thick bottom plate for quick temperature recovery.
- ▶ Chassis, supporting frame and structure made of stainless steel (DIN 1.4301/AISI 304) 3mm thick.
- ▶ Thanks to the optimized heating system, the precise temperature control and the high density insulation, *thermaline* Braising and Pressure Braising Pans **reduce significantly the energy consumption.**

Top performances

The high performance powerblock heating system ensures precise temperature control as well as even heat distribution for more efficiency and excellent cooking results even with big loads, regardless low installation power required.

Thanks to minimal temperature drop and fast temperature recovery the consistent and high quality cooking results are guaranteed day after day.

High Flexibility

- ▶ **Pressure cooking*** ensures a dramatic reduction in the cooking time, providing high food quality and saving energy.
- ▶ **Multi-layer cooking*** at the same time thanks to the possibility of using gastronorm containers on the top to steam vegetables or rice while braising below, during the pressure cycle.
- ▶ **Multi-zone grilling**
Set different temperatures on the left and right zones and cook different foods at the same time or create a holding zone for the same product managing the preparation on a single plate.
- ▶ **Braising or boiling** mode are easily selected with the touch control.
- ▶ **In boiling mode** all the boiling pan functions are available.
- ▶ Power level control and soft function available in both boiling and braising modes for the best food quality and energy savings.
- ▶ Rear closing kit and Marine flanged feet, delivered with the appliance, assure stability and safety.

* pressure braising pans

ProThermetic Boiling Pans

High performance and versatility at its best. Make your work day simple and profitable with thermaline ProThermetic Boiling Pans. The ideal choice to prepare large quantities while maintaining excellent quality.

Durable and Reliable

The ProThermetic Boiling Pans deliver outstanding results **even in the toughest conditions**

- ▶ Internal surface of the vessel is in DIN 1.4404 AISI 316L for greater resistance even with acidic products
- ▶ Heavy duty cooking well from 3 mm up to 5 mm thick (depending on capacity, top or bottom of the machine)
- ▶ Chassis, supporting frame and structure made of stainless steel (DIN 1.4301/AISI 304) 3mm thick.
- ▶ The thermaline ProThermetic appliances save energy also thanks to the insulation system which keeps the heat inside the cooking vessel.

Top performances

- ▶ **Perfect boiling** with the highest uniformity thanks to the indirect heating system which guarantees cooking quality without sticking.
- ▶ Thanks to the indirect heating system with steam at 1.5 bar (125°C) pressure in the double jacket, heating times are reduced automatically.
- ▶ The design of the pan ensures ideal heat distribution as well as an easy stirring process and the possibility to prepare small food quantities.

High Flexibility

The Chef's best friend

Ideal for any **creamy preparations** such as fruit jams, sauces, soups, purées and mashed vegetables.

Easy mixing and stirring

Boiling pans are equipped with a stirrer (specific models) offering the possibility of three stirring cycles: one direction, two directions with 4-second pause, two directions with 16-second pause.

Perfect cooking results also with large productions

Boiling pans are available up to 300 Lt, delivering perfect results with the highest uniformity with the indirect heating.

High quality boiling also with delicate food, thanks to 9 power levels and the soft cooking function.

Double-wall insulation of the boiling tank and boiler.

Rear Closing Kit and Flanged Feet

Rear closing kit and Marine flanged feet, delivered with the appliance, assure stability and safety.

Multiple benefits

Simple and Effective Control with the Touch Screen Panel

The touch panel makes the use straightforward.

The electronic control monitors continuously the temperature and reacts instantaneously at the need of the chef, delivering the power much faster and more precise compared to traditional electromechanical system.

Full Hygiene, Inside and Outside the Cooking Vessel

The ProThermetic range is certified IPX6*, 8 times higher than market standard protection against strong jets of water. Thanks to the high degree of water protection, the appliances can be quickly cleaned by spraying water directly onto the outer surfaces.

Comfortable and Precise Operation with the Variable Speed Motor Tilting.

Variable speed tilting system regulates the tilting speed so that food does not spill over, whatever the angle of inclination. Tilting axis reaches more than 90° allowing the complete emptying and eliminates residue and therefore corrosion over time.

Connected solutions and USB connection

Update with OnE Connected, your digital assistant, helps you get top performances from your Electrolux Professional solutions. This will maximize your profits and accelerate your return on investment.

*The thermaline products exceed all international IEC standards (60529) regarding water flow: IPX6 water protection level guarantees a flow of 100 litres/minute at 2,5 bar, at the distance of about three metres, lasting 4 minutes and reaching 400 litres of water.

Multiple savings

up to **20%** less
Up-front investment

More space and lower running costs with ProThermetic Pressure Braising Pans

As kitchens are getting smaller and menus are growing larger, ProThermetic Pressure Braising Pans can replace a number of appliances, offering many advantages*:

- ▶ Less space needed for the appliances (**up to 45 less**)
- ▶ Lower cleaning costs (**up to 40 less**)
- ▶ Lower investment (**up to 20 less**): 2 appliances in 1
- ▶ Lower labor costs due to easy and error-proof operations

Energy consumption is significantly reduced thanks to the optimized heating system, the precise temperature control and the high density insulation.

up to **80%** less
Energy saving

up to **60%** less
Cooking time

*Calculations based on internal tests comparing the Pressure Braising Pan to the traditional system = Boiling + Braising Pan.

Excellent savings with the ProThermetic Boiling Pans

Do More in Less Time.
Boiling up to 40% Faster

The *thermaline* Boiling Pans are very high performing. The **closed double-wall indirect heating system** grants rapid heating and cooking times, thanks to the steam pressure at **1.5 bar**, generating **125 °C** within the double jacket. **The heating time (20-90 °C) of 100 lt Electric Boiling Pan is less than 30 Minutes.**

*Calculations based on internal tests comparing the Pressure Braising Pan to the traditional system = Boiling + Braising Pan.

Save Energy and Money

Benefit from higher energy savings and more pleasant working conditions thanks to the **insulated double-wall** and **double insulated lid** that keep all the heat in the units, providing less dispersion into the environment.

Stirrers & Measuring rods

Stirrers with scrapers

Range	Tilting, Electric and Steam Powered Round Boiling Pans				
Appliance typology	60 L	100 L	150 L	200 L	300 L
PNC	910091	910093	910094	910095	910096
Material	Stainless Steel AISI 304 - DIN 1.4301				

- ▶ Not included with the boiling pan, must be ordered separately
- ▶ To be ordered for boiling pans predisposed for stirrer only.

Stirrers without scrapers

Range	Tilting, Electric and Steam Powered Round Boiling Pans				
Appliance typology	60 L	100 L	150 L	200 L	300 L
PNC	910061	910063	910064	910065	910066
Material	Stainless Steel AISI 304 - Din 1.4301				

- ▶ Not included with the boiling pan, must be ordered separately
- ▶ To be ordered for boiling pans predisposed for stirrer only.

Measuring rods

Range	Tilting Boiling Pans				
Appliance typology	60 L	100 L	150 L	200 L	300 L
PNC	910042	910044	910045	910046	910047
Material	Stainless Steel AISI 304 - DIN 1.4301				

Additional factory fitted accessories

Kit energy optimizer / Potential free contact

Range	All ProThermetic, factory fitted
PNC	912737

- ▶ The kit is used to prearrange ProThermetic electric appliances of standard voltage 400V 3 for energy optimization or external surveillance systems

Connectivity kit

Range	All ProThermetic, factory fitted
PNC	913577

- ▶ Kit to connect the units to the network via cable
- ▶ Suitable for HACCP data collection (replacing the previous 912781)
- ▶ These kits are not required to download HACCP log to a USB drive

Additional factory fitted accessories

Main switches

Range	All ProThermetic, factory fitted	
Ampere	25	
Section	2.5 mm ²	4 mm ²
Type	All Steam	Electric PBOT06 PFET06/09 PUET06/09
PNC	912739	912773

Main switches

Range	All ProThermetic, factory fitted	
Ampere	60	
Section	6mm ²	10 mm ²
Type	Electric PBOT10 PBOT15 PFET10/17 PUET10/17	Electric PBOT20 PBOT30
PNC	912740	912774

Emergency stop

Range	All ProThermetic, factory fitted
PNC	912784

- ▶ Already included in units with stirrer device.
- ▶ Installed on the left side in tilting units.

Additional factory fitted accessories

External touch control devices

Range	All Tilting, factory fitted		
PNC	913699		

- ▶ Installed on the right side.

Lower back panels

Lower Back Panels - Tilting appliances

Range	All Tilting, factory fitted		
Size DxH	80x300 mm		
Width / PNC	1100 mm	1200 mm	1300 mm
	912767	912768	912769
Width / PNC	1400 mm	1500 mm	1600 mm
	912770	912771	912772
Material	Stainless Steel AISI 304 - DIN 1.4301		

C-Boards (Backsplash)

C-Boards (USPH C-Board on request)

Range	All Tilting, factory fitted		
Size DxH	1,5x40 mm		
Width / PNC	1100 mm	1200 mm	1300 mm
	912183	912184	912185
Width / PNC	1400 mm	1500 mm	1600 mm
	912186	912187	912188
Material	Stainless Steel AISI 304 - DIN 1.4301		

- ▶ Bended in one piece with crossbeam, 40 mm high.
