Swiss Design

Since 1871

Production,
Precision
and Tradition
for over 150 years

Swiss Design delivered around the world from a world class factory based in Switzerland. Made for your Excellence

Boiling pans line 1930

First generation of tilting boiling pans 1934

Cooking installation in Kloster 1960

A strong passion for innovation, a special attention to customers and a genuine belief in sustainability: these are the core values inspiring Electrolux Professional and supporting its vision.

A story that dates back to 1871 and continues today, a history of Electrolux Professional Swiss designed products which is directly connected to the *thermaline* product family, global player in the market. *thermaline* offers state-of-the-art technology, high quality, innovative design and easy-to-use appliances, thanks to the know-how that can be acquired over one hundred years of expertise. The elegance of the M2M products results in appliances that can fit into reduced spaces without sacrificing performance, cleanliness and attractiveness.

Incomparable Swiss design

Infinite combinations, reliable innovation, superior flexibility and the highest quality standards.

High performance & reliability

Precise temperature control with perfect heat uniformity. Highly resistant construction with impeccable finishing.

Energy savings

Innovative solutions for high efficiency and savings. Less consumptions and lower running costs. Better for your business and for the environment.

Simple & Safe

Everything made easy. Superior ergonomics, maximum cleanability and operator safety guaranteed.

Electrolux
PROFESSIONAL

Sursee, Switzerland.
therm*al*line Competence
and Production Center

thermaline Incomparable Swiss Design

Sursee, Production and Competence Center

Dedicated to excellence, the 25,970 m² Production Center not only houses the production equipment, the laboratories and the quality management team, but also acts as a global Competence Center to provide faster and more efficient support to kitchen planners and their global customers.

Heating and cooling without fossil fuels

The Sursee Production and Competence Center is powered by an innovative geothermal system, a closed heat exchange system to facilitate fossil fuel-free heating and cooling of the building. The pumps draw heat from the ground in winter and discharge heat from the building into the ground in summer. The geothermal system reduces annual energy consumption and CO₂ emissions by 92% (=500 tons corresponding to 2,500 trees) reflecting Electrolux Professional's emphasis on sustainability.

Energy savings

The geothermal system guarantees up to 70% savings in energy on an annual basis. In addition, the Sursee Production Center uses a sustainable lighting system as well as the newest laser-cutting equipment that contribute to a substantial reduction in energy consumption. The lighting also improves working conditions, which optimize production quality.

Essentia Teamed to serve you. Anytime, anywhere

Essentia is the heart of superior Customer Care, a dedicated service that ensures your competitive advantage. Provides you with the support you need and takes care of your processes with a reliable service network, a range of tailor-made exclusive services and innovative technology.

You can count on more than 2,200 authorized service partners, 10,000 service engineers in more than 149 countries, and over 170,000 managed spare parts.

M2M

One-of-a-kind design

M2M-Made to Measure is created to offer every top chef a **partner** for life with the latest **professional technology** and ultimate kitchen design.

The team of experts is at your disposal to provide prompt answers to **your needs** and to make the kitchen of your dreams become a reality.

An **M2M-Made to Measure** cooking suite is customized in every detail, each single part is designed for **specific project** including the internal double structure covered by **3 mm unique top for greated robustness**.

Smooth and Sturdy One Piece Top

The worktop of a thermaline Block is completely smooth. The single appliances are welded in the unique top without junctions. Therefore it is very easy to clean and very comfortable to work on.

Highest Comfort

The worktop can be customized with rounded edges, splash guards, lowering and protection rails.

Best return on investment also in heavy duty conditions

The extremely sturdy construction allows to work also with heavy and hot pots and pans without any deformation of the work top. The unique top is made of a 3mm 1.4301 (AISI 304) with "U" reinforcements on the bottom.

Fry Top, uniformity and
temperature control

USPH Standard

Electrolux Professional
appliances guarantee high
level of hygiene in accordance
to USPH standard.

CAUTION! TURN ON THE FRYER ONLY

Rolling racks for Pot & Pan stability

Large drawer to collect grease

Tailor-made elements, including splashback and lower working top and more to create ideal working conditions

H3 base assures perfect cleanability and hygiene.

Express your cooking creativity

Customized high performing cooking suits with **one piece top** offer more than 40 options to satisfy most demanding preferences.

The team of experts is at your disposal to provide prompt answers to **your needs** and to make the kitchen of your dreams become a reality.

Induction with rolling rack for perfect stability

H3 base for perfect cleanability

Large range of appliances available, including unique multifunctional units, best-in-class **energy efficient functions** and solutions offered exclusively in M2M-Made to Measure execution.

These are only a few of the options which are offered in a **variety of modular widths, depths, body heights and installations**: fry tops with powerblocks, free-cooking tops, aquacookers plus, high power chargrills, pasta cookers and fryers.

Specializing in energy savings and efficiency

Perfect heat uniformity and precise temperature control
The high performance Power Block heating system on electric fry tops ensures even temperature distribution for greater efficiency and excellent cooking results. Working temperature from 80 to 280 °C regulated with high accuracy.

Chrome Plate
All *thermaline* frytops feature chrome plating, designed to conserve energy by retaining heat, while also boasting non-stick properties for easy cleaning.

Ecotop for energy savings
thermaline Modular 90 for pot and pans cooking features Ecotop with its special coating to prevent heat dispersion and ensure savings. Reduced heat radiation to the outside of the cooking plate. Ecotop cooking hobs are equipped with 2 sensors per zone for optimal temperature control and monitoring, and offer 8 power levels reaching a maximum working temperature of 450 °C.

Energy saving

thermaline appliances are designed to reduce water use, energy consumption and environmental emissions. Most of the electric functions also have stand-by mode for energy saving and quick recovery of maximum power.

Safety and versatility with induction

Fast

Induction is significantly faster when it comes to cooking than other indirect cooking system

Energy savings

Induction hobs recognize whether or not a pan is placed on the cooking zone. **Power is only generated when pot is present.**

Safe

Induction is safe, the surface's temperature is relevantly lower than other indirect cooking appliances

Clean

Induction is easy to clean. As only the pan is heated it means that splliages do not get baked on

Fast and precise cooking

With *thermaline* induction hobs the maximum power level is reached within seconds. The **heating can be raised or lowered instantaneously** to perfectly perform different cooking processes. Temperature can be **precisely adjusted** according to specific needs with 9 different power levels.

Delicate food can be gently cooked at lower power levels where instead larger quantities can be managed at maximum power.

Flexible configurations

thermaline offers a **complete range** of induction appliances, including full surface, single point induction and wok. The induction top can be **combined** with a number of bases, including electric ovens, warming and holding cabinets.

up to **90%***
energy efficiency

* based on internal laboratory test related to the other indirect coking system

The induction cooking system, applied to ceramic glass, allows rapid and completely safe cooking without heat dispersion reaching up to 90% energy efficiency. Induction guarantees power and delicacy all in one. Any type of cooking becomes faster and cleaning is easier.

ALL INSIDE

Beyond durability

Unique chassis

thermaline Modular 90 boasts a strong internal frame resistant to bumps and corrosion, thanks to its 2 mm thick stainless steel construction. This unique chassis guarantees structural reliability in any type of installation (on feet, wall mounted, plinth from others).

Multifunctional

There are never enough cooking tops in a high productivity kitchen. Free-cooking tops and Aquacooker Plus fit to a variety of cooking techniques and types of food preparation. Flexibility, outstanding results and energy efficiency are guaranteed.

Power under control

Express your cooking creativity with a 1°C accurate temperature setting. The unique retro-illuminated glass display and the highly-visible LED digits provide full control of your operation.

Perfect hygienic connection

The Thermodul water proof and seamless connection between cooking functions (ProThermetic Boiling and Braising Pans included) avoids liquid infiltration assuring high level of hygiene.

Technological innovation for professionals

Pasta cooker

Extremely versatile and high performance, offer a step-controlled infrared heating system positioned below the well to ensure higher performances and efficiency.

Free-Cooking top

The quality of your dishes is ensured by a multi-function free-cooking top featuring direct or indirect cooking using any type of pots and pans located within 2 or 4 cooking zones.

Perfect cooking results thanks to the **1°C precise** temperature electronic control within a **80-350°C range**.

Non sticking cooking plate in **massive 20mm thick** stainless steel **AISI 316 - DIN 1.4404**.

Aquacooker Plus

Water-based, multi-purpose kitchen preparations, including sous-vide, holding and boiling can be produced quickly with the Modular 90 Aquacooker. Cooking well is in stainless steel 1.4435 (AISI 316L) for superior resistance against corrosion.

Precise temperature control within **1°C** and automatic water filling ensure excellent results and overnight cooking as well.

Deep fat fryer

The V-shaped well offers high performance and efficiency, brings oil to frying temperature quickly. Ensures high productivity and a longer oil life thanks to uniform distribution of heat and to the external heating elements. Fast removal of food residuals and easy cleaning thanks to rounded corners and precise laser welded well.

PATENTED*
(EP270881381 and related family)

Fry top NitroChrome3 guarantees extreme resistance to scratches offering in addition the anti corrosion and no stick properties of all the chromium surfaces
Uniform heating is guaranteed with the Powerblock heating system and assures maximum results regardless where the food is placed.
Very precise temperature 80-280°C electronic controlled with 1°C accuracy.

High Power Chargrill

Even, flawless grilling, portion after portion and the fastest heat-up time, quick heat technology, not only heats the grill in record time, but also cuts cooking times too thanks to heating elements coupled with cooking grids and PATENTED Heat Boost removable deflectors.

Cleaning is also easy and fast thanks to the removable and dw safe grids and deflectors and the water basin underneath, collecting the grease and fat coming from the grilling.

PATENTED*
(EP270881381 and related family)

The warranty of hygiene always perfect

H3 Base

Optimal cleaning result with H3 open and closed base, thanks to rounded edges in 3 dimensions (bottom, top and sides) for unparallel hygiene.

Cooking options

with raised drip edge. Safety and hygiene are guaranteed by a raised drip edge around fryers, pasta cookers, aquacookers plus and bain-maries which prevent contaminating liquids from entering the wells.

Safety and comfort in your kitchen

Metal knobs

with silicon grip
Metal command knobs feature non-slip, heat-resistant silicon grips for precise control. The heavy duty metal knobs resist high temperatures and the silicon inserts ensure excellent insulation.

Highly visible LED

for full control
The retro-illuminated tempered glass display with 4-digit LED highly visible offering full control from a distance for all operations.

Flanged feet

All freestanding units come as standard with flanged feet assuring safety on board. As option, appliances can be also installed on plinth and wall hanging.
