Espresso Technology since 1919

# AURA

Designed and manufactured by UNIC, the AURA range offers premium equipment that ensures an espresso of exceptional and consistently high quality.

# AURA'S AESTHETICS AND PERFORMANCE COMBINE FOR GUARANTEED RESULTS

The AURA range includes 2- and 3-group models. With its ultra-contemporary styling, it presents a bold, refined silhouette enhanced by LED-lit front-panel controls. Designed to deliver both performance and intuitive operation, AURA provides baristas with a practical and ergonomic tool suited for demanding coffee service.

## MAESTRO thermo-regulated brewing groups

- MAESTRO brewing groups are directly coupled to the internal boilers, ensuring excellent thermal stability for consistently precise espresso extraction.
- Precise control of the brewing process ensures every espresso is extracted at the optimal temperature.

## Independent volumetric control boxes

- Each control box offers four programmable doses plus manual start/stop.
- Intuitive programming of pre-infusion, steam pressure, rinsing cycles, and LED lighting customization.

## Performance and ergonomics

- The patented DOSAMAT® technology increases efficiency and workflow: once the portafilter (single or double spout) is engaged on the group, it is automatically recognized and the machine launches the desired volume.
- With Easylock technology, hydraulic assistance for locking the portafilter minimizes barista wrist fatigue, ensures greater consistency between cycles, and extends the lifespan of group seals.

## Equipment for every need

- Mitigated hot-water outlet controlled by two programmable timers.
- Steam is manually controlled with the Steamglide lever, while the second steam outlet is fully programmable.

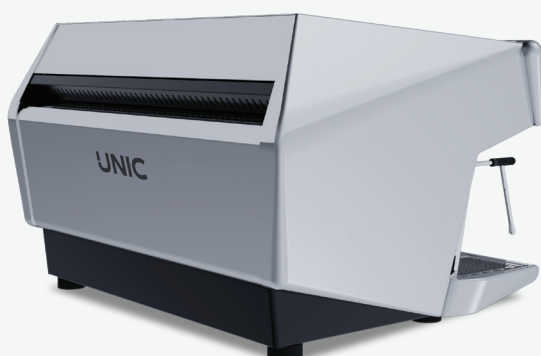

## Technical features

	AURA 2	AURA 3
Width	794 mm	984 mm
Depth	592 mm	592 mm
Height	490 mm	490 mm
Weight	73 kg	83 kg
Boiler capacity / Power	10,1 L / 4300 W	15,6 L / 4300 W
Power	4800 W / 20 A (Single) 4800 W / 7.2 A (3+N)	4800 W / 20 A (Single) 4800 W / 7.2 A (3+N)
Voltage	230 V (Single) 400 V (3+N)	230 V (Single) 400 V (3+N)

All machines are available in 50Hz or 60Hz.
