

The master solution in all dimensions

Line 6000 FFS Vibe Ironers

Smooth operations, customized results

Smooth and effortless operations with only one operator for highest productivity. Intuitive smart interface that allows advanced programs customization and perfectly ironed linen complying to hygiene standards.

Certified ergonomics

Reducing workload, easing stress, intuitive and user friendly

Optimum productivity

Brilliant results with optimised staffing costs maintaining strict standards of hygiene

Trustable Hygiene

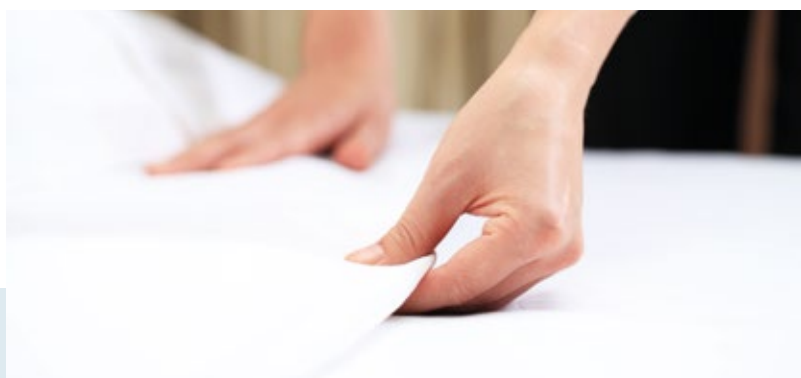

Hygiene and safety guaranteed with perfect moisture control

Tried&tested Durability

Guaranteeing consistent results without interruption

Unique technologies tailored for you and for your peace of mind

Extreme customization of the ironing program

Up to **99 customized programs** thanks to innovative parameters which take into account linen size, fiber composition and thickness. Each program can be customized also according to the linen folding requested. This certifies the extreme flexibility of the machine, and ultimately guarantees tailored final results and impeccable quality of the linen delivered. The machine **detects and rejects linen that does not adhere to final quality expected according to parameters settings.**

UNIQUE*
in the industry

Pure Hygiene: Flawless Dry Linen Delivery

Hygiene Guard is a feature that, in synergy with the Diamms®, will **automatically reject the linen**, in case linen humidity parameters are not respected. By doing so we ensure that the processed linen comply with no exception to the standard for RABC. (below or equal 8% after ironing process).

UNIQUE*
in the industry

On your operators' side

Superior ergonomics guarantee better working conditions and higher staff satisfaction, leading to less absenteeism, lower staff turnover and training requirements.

An interface with you in mind

- Intuitive full HD 7" color touchscreen and compatible with any language.
- Minimum operators training thank you interactive interface
- Direct upload of library
- Technical pages for statistics, customization and for maintenance and service support
- Operator ID for traceability of all operations.

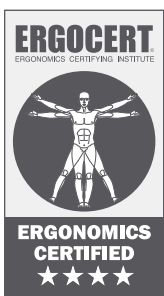

Intuitiveness was verified and approved as test operators were able to initiate the appropriate programs based on the need of the specific linen requirements.

Experience 4 stars

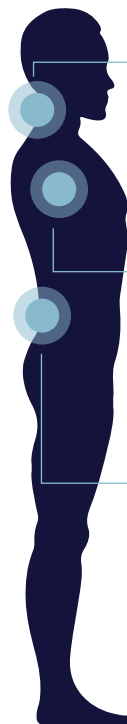

Pioneers in ergonomics certification

Ergonomic interventions can reduce work-related musculoskeletal disorders (WMSDs) by **59%**, with an average decrease of **75%** in sick days and a **25%** increase in productivity.

Washington State
Department of Labor &
Industries

Ergonomic perfection:

Optimized interface position

Users experience considerably less neck pain as a result of an improved interface height which decreases awkward neck up-down postures.

Natural clamp height

Feeding is now more comfortable due to reduced shoulder elevations. The more natural positioning of the clamps means that arm-shoulder stress or injury is no longer an issue.

Ideal stacker height

No more damage to back posture while picking up piles of linen thanks to a new and improved stacker height.

Optimal hygiene, enhanced productivity

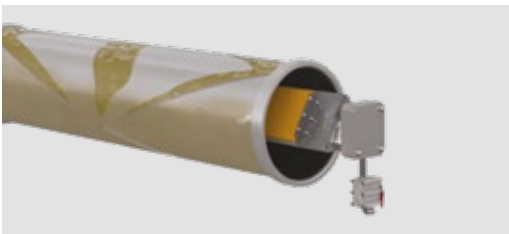

Guaranteeing safety to your guest is a must, hygiene is always under control even with high level of productivity.

**+30% extra
productivity and
unique performance**

No more overheating, no loss of production ever again, thanks to the "Dubixium™" cylinder. **Heat is always evenly distributed throughout the length of your ironer** by means of a patented thermal oil flow inside the cylinder. No need for steam for brilliant results.

FIRST
in the industry

UNIQUE
in the industry

To avoid the spread of bacteria, operators would need to adjust the speed depending on the residual moisture.

**Consistent Perfection
with DIAMMS™
technology**

DIAMMS is a feature which operates automatically at optimum speed whilst perfectly managing the moisture in your laundry and it will reduce the operators manual handling as it will not need to touch the linen to check if they are dry. Therefore, it guarantees optimum hygiene, safety, perfect humidity control and cost-efficiency

How does it work?

A sensor comes into contact with the fibre automatically **regulating the cylinder** speed and therefore guaranteeing **perfectly dry** bacteria free linen (in line with **RABC international standards***) for **hygienic excellence every time**. If the retained humidity is too high, a specific indicator on the user interface will light up.

*humidity level under 8%
