Generation 7000
ENDLESS POSSIBILITIES

7 reasons to choose The Compact Power

The Compact Power
Small spaces. Ultimate performance

Washers and Dryers
PARTNERS CARDS

The only fully professional small chassis laundry solution, now available in 6kg, 7kg and 8kg capacities and built for over 40,000 cycles.

1. Sell more. Save more.

Give customers a more sustainable laundry solution and partners get a stronger margin opportunity. AI-inspired technologies, built-in saving features and ergonomic design help make the product easier to sell, while service-friendly engineering supports long-term customer confidence.

2. Next-level serviceability

Modular design, fewer components and shared parts help make maintenance faster, simpler and easier to plan. That means less time on site, fewer resources needed and better service profitability.

3. Fully professional reliability

Robust construction and Swedish engineering deliver the durability customers expect from a professional laundry solution. For partners, that means fewer issues, smoother service relationships and greater peace of mind.

4. Smart technology that opens up new opportunities

Class-leading performance in a small footprint, helping partners win more business with small businesses and space-limited sites. Customers get professional results without compromise, and partners can protect and grow market share.

5. Built for rental and leasing

Over 40,000 cycles supports longer machine life and lower capital expenditure per wash and dry. Up to 10,000 extra cycles help strengthen rental, leasing and service models.

6. Connected for smarter service

With OnE Connected and over-the-air firmware updates, partners can monitor machines, manage interventions and schedule service calls more efficiently. Less wasted time, fewer unnecessary visits, better service and less pressure on margins.

7. Swedish heritage that sells

With a global reputation for quality, innovation and sustainability, Electrolux Professional gives customers a long-term investment that pays back cycle after cycle, and gives partners a proven laundry solution to sell, lease and support

Longer life, lower cost, greater return

The new benchmark in professional laundry

The Compact Power
Small spaces. Ultimate performance

Washers and Dryers
PARTNERS CARDS

The Compact Power out-performs everything else on the market. It's more cost effective, sustainable and profitable. It's the solution designed to help partners sell more and help businesses save more.

- **40,000 cycles**

Built for long-term performance, helps reduce capital cost per wash and dry, making it a stronger investment for customers and a stronger proposition for partners.

- **AI-inspired technologies**

Smart automation optimizes water, energy and detergent use, supporting sustainable operations and lower running costs.

- **Lowest cost per cycle and fastest dry-to-dry**

AI-inspired technologies and Swedish engineering work together to reduce energy consumption, improve the wash process, minimize drying demand and help businesses achieve faster turnaround with lower operating costs.

- **Small chassis, flexible capacity**

Available in 6kg, 7kg and 8kg capacities, with stackable options to suit different spaces, workloads and sectors.

- **Ultra performance**

Compact size does not mean reduced capability. The Compact Power delivers the productivity, power and professional results businesses expect from larger machines.

- **Swedish engineering**

Proven quality, reliability and durability make The Compact Power a confident choice for professional laundry customers and a valuable solution for partners to sell, lease and support.

Durability is the new profit

Longer-lasting equipment supports higher revenue and lower operating cost

The Compact Power
Small spaces. Ultimate performance

Less water, better flow and cleaner results

Poor movement inside the drum can waste water, create uneven cleaning, stress fabrics and increase maintenance.

FlowDrum Design keeps water and textiles moving smoothly while ensuring the lowest water consumption

INTELMESH

- **Better performance** for consistent deep cleaning while protecting fabrics
- **Stainless steel drum lifters** for a durable and fully professional construction you can trust

LINTLESS DESIGN

PATENTED

- **Reduced lint build-up** for smoother water flow and less friction
- **Fewer service issues** thanks to the cleverly positioned heating element

GOODBYE DEAD VOLUME

PATENTED

- **Water savings** due to innovative Swedish design
- **Rotate and install for easy servicing** with our smart valve as it's not screwed into the outer drum

UNIQUE
IN THE INDUSTRY

No compromise in the washing results

Washers and Dryers

Washers and Dryers
PARTNERS CARDS

Less moisture in means faster drying times

Drying is one of the most expensive parts of laundry. The more water left in the load after washing, the harder the dryer has to work.

Xtracta40 Technology uses unique, innovative engineering features to achieve a low residual moisture below 40%.

**ULTRAG
SPIN CORE**

- **600G-force – extreme spin power** boosts washing time with industry-leading moisture removal
- **Shorter wash and drying time,** with better control of costs
- **Faster dry-to-dry** throughput means more loads completed per day

**FORCE
CONTROL
PLATFORM**

PATENTED

- **Swedish quality and innovation** means our absorbers and suspensions can handle even the fastest G-force, cycle after cycle

**DYNAMIC
COUNTERBALANCE
INTELLIGENCE**

**UNIQUE
IN THE INDUSTRY**

- **AI-driven speed adjustment** throughout the extraction sequence ensures perfect results
- **Load detection sensors** precisely monitor load distribution, water content and extraction speed to optimize dewatering

solution in
the market**

**Lowest residual
moisture of less than**

40%

ADAPTIVE
CYCLE
PROCESS

The Compact Power
Small spaces. Ultimate performance

Just the right resources for every load

Not every load needs the same water, detergent or time. So even small loads can be optimized for efficiencies and savings.

MINIMUM
WATER USE

- Only the exact amount of water is used thanks to the automatic load detection, the new FlowDrum Design and the innovative control panel that manages the cycle, automatically

INTELLIGENT
DOSING

- Precise dosing ensures no waste with just the right amount of chemicals used every time. Our automated detergent pump ensures consistent results time after time.

LOAD
INTELLIGENCE

UNIQUE
IN THE INDUSTRY

- The first dryer in the market with integrated load intelligence. It perfectly detects any load and saves up to 8% in energy consumption when used in conjunction with the EcoProgram.

Washers and Dryers
PARTNERS CARDS

Smart intelligence for every
laundry load reduces energy
consumption and saves up to

8%

Why it's the fastest dry-to-dry solution available on the market

Using AI-inspired technologies, optimized water flow and advanced extraction, our wash cycles do more than clean. They save water, reduce energy and prepare every load for faster, more efficient drying.

Reliable day after day, cycle after cycle. Repeatable, professional results ensure businesses maintain service levels, standards and profits.

Washers and Dryers
PARTNERS CARDS

STEP 1:

Wash with less waste

WATER SAVINGS

- The washer uses less water without compromising results, saving 24% on average*

TIME SAVINGS

- Improve daily throughput and keep laundry moving with fast, efficient cycles

ENERGY SAVINGS

- Advanced extraction help save energy in the washer and support further savings in the dryer

STEP 2:

Extract more moisture and transfer savings to the dryer

**LOWEST
RESIDUAL
MOISTURE**

- Reduces drying time and saves energy due to the washer's powerful moisture extraction

15% SAVINGS TRANSFER

- The washer helps transfer up to 15%* additional energy savings to the dryer by removing more moisture

*Savings compared to Line 6000.

The savings stack up

**The washer starts the savings;
the dryer builds on them**

In every laundry cycle, savings are created in stages. The Compact Power washer removes waste from the wash process, then passes those savings on to the dryer by leaving less moisture in every load.

**The washer and dryer work together to give you
the lowest total cost of ownership on the market.**

15%
savings transfer
with below 40%
residual moisture

High moisture
extraction transfers
savings to the dryer

up to **65%**
energy savings
with Heat Pump
technology

STEP 3:

Dry more efficiently

HEAT PUMP DRYER

**M.E.M.E.
MINIMUM ENERGY
MAXIMUM EFFICIENCY**

- **Patented Heat Pump technology**, electronic valve and inverter optimization, can save up to 65%* energy

PATENTED

up to **8%**
extra savings with
Load Intelligence
and EcoProgram

STEP 4:

Adapt to the load

**LOAD
INTELLIGENCE**

- **Small load? No problem.** It recognizes the drum load and adjusts accordingly

**FIRST
IN THE INDUSTRY**

**ECO
PROGRAM**

- **Save up to 8% energy** by choosing the EcoProgram which matches the drying process to the load size

**UNIQUE
IN THE INDUSTRY**

**SUSTAINABLE
OPERATIONS**

- **The dryer automatically stops** at the selected dryness level, avoiding wasting energy

**The result is faster dry-to-dry
performance, lower energy
use and better control of
your operating costs***

Look below the surface

A slimmer iceberg, a smarter investment

The upfront purchase price is only
a small part of your investment.

The larger cost sits below the surface: water,
energy and detergent. The Compact Power
is designed to reduce these ongoing costs.

We've driven operational costs down with
advanced engineering and innovative features.

This all means you'll see:

- quicker returns on your investment
- much lower total cost of ownership
- a more efficient and profitable business

THE BENEFITS

END CUSTOMERS

- **Real-time monitoring**
See machine status, consumption and performance data all in one place
- **Lower running costs**
Track energy use and identify opportunities to improve efficiency
- **Remote diagnostics**
Understand issues before visiting site and plan the right response
- **OTA software updates**
Keep machines up to date remotely, without unnecessary disruption
- **Service planning support**
Use platform insights to help plan interventions more efficiently, reducing downtime
- **Hygiene monitoring**
Automatically log disinfection cycles and flag failed cycles In care settings
- **Cyber Security Approved**
ISO 27001 compliant and world renowned for trusted information security
- **Cloud-to-cloud API**
Integrate appliance data with in-house management systems and partner platforms

TECHNICIANS AND PARTNERS

Simplifies and optimizes service operations, making them easier and more profitable:

- Service planning support
- Remote software updates
- Remote diagnostics and monitoring
- Smarter and more efficient organization
- Reduce time, resources and cost, so you can deliver efficient service without compromising your margins

3 Pillars of OnE Connected:

- 1 Differentiate your offer:**
transparency, control, and a "smarter operation" story customers understand
- 2 Make service proactive:**
remote visibility and diagnostics reduce wasted visits and improve service efficiency
- 3 Grow the ecosystem:**
integrations via APIs enable payment platforms and partner solutions when needed

OnE Connected gives customers control, gives technicians visibility and gives partners a stronger service relationship.

Service and maintenance made easy

With its durable construction, **modular design** and **60% fewer components**, it's been designed to make servicing faster, simpler and less disruptive. Technicians can work efficiently, so your business can minimize downtime and maintain productivity.

Modular design for easier ownership

- 60% less components means less complexity
- Smarter functional design
- Fast, easy maintenance
- Reduced downtime

60%

fewer components for ease of maintenance and better durability

Electrolux Professional is the preferred choice for professionals and technicians

PROFESSIONAL SERIES

Speed of access and repair have been designed in from the ground up

MOVABLE CONTROL PANEL

In stacked set-ups, the control panel can be easily moved to a comfortable height in less than **10 minutes**

UNIQUE
IN THE INDUSTRY

FRONTAL ACCESS

New – There is no need to pull washers and dryers out of their location as there is full, easy access from the front

EASY HOOK

Designed for safety and convenience, the door hangs securely on its own while screwing or unscrewing takes place – no need for extra hands to hold it still

PATENTED

DISASSEMBLABLE DRUM

Innovative construction allows for straightforward servicing and repair

END CUSTOMERS

- **Easy maintenance;** limiting downtime and lost profits
- **Professional series equipment;** quality and service guaranteed
- **Flexible configurations;** at no extra charge or time delays
- **Fast, prompt and easy service;** from installation to replacement

TECHNICIANS AND PARTNERS

Serviceability made easy:

- Common spare parts
- Easy access
- Less complexity
- Simple maintenance

Professional series washer:

- Frontal access
- Fast unscrewing
- Disassemblable drum

INDUSTRY

• **ReLife Program**

Modularity enables green practices, like R+live, our remanufactured machines. So, we're not wasting resources, or damaging the environment

• **Empowering the Sustainable Laundry**

Green practices that benefit all of the stakeholders along the value chain

Because the hero is you

The Compact Power
Small spaces. Ultimate performance

Washers and Dryers
PARTNERS CARDS

The Compact Power is the perfect choice for businesses with **limited space**, who don't want to compromise on **performance**

Small businesses

Hairdressers, bakeries, coffee shops... those busy businesses that demand performance in a limited space

- Saves space
- High productivity
- Easy to use

Hospitality

Hotel guest laundries, Bed & Breakfasts... the places that demand specific applications and emergency solutions

- Saves space
- lagoon Advanced Care®
- Easy to use
- High cleaning results

Care facilities

Small care homes, nursing homes, child daycare centers and other businesses that have hygiene as a primary focus

- Hygiene validation
- Saves space
- High productivity
- Easy to use

Marine

Marine vessels need solutions that perform reliably in rough seas

- **Reliable under harsh conditions**
- Easy to use
- High serviceability

Consumer operated

Small apartment house laundries, student housing, marinas, coin stores... places that demand high throughput and low running costs

- Compactness
- High productivity
- Easy to use
- High cleaning results

Facility management

When you're in charge of keeping floors clean, you must rely on robust and efficient cleaning solutions

- Copes with heavy-soiling
- Easy to use
- Hygiene validation
- Adaptable to all needs

Professional textile care

For forward-thinking textile care professionals seeking growth through innovative wetcleaning services for delicates, shoes and accessories

- Safe for natural fibers
- Complete packaged solution
- Fast return on investment

Swedish Heritage makes the difference

Swedish engineering is recognized worldwide for its outstanding quality, innovation and sustainability.

When you choose Electrolux Professional Laundry equipment you are making a long-term investment that is designed to help your business be more profitable, efficient and sustainable.

With Compact Power you can expect ultimate performance for the lowest cost per cycle for a lifetime of over 40,000 cycles.
