- ▶ In recent years over 70% of our product features have been updated with the environmental needs of our customers in mind
- ▶ Our technology is RoHS and REACH compliant and over 95% recyclable
- ▶ Our products are 100% quality tested by experts

Cleaner mops  
for cleaner  
floors

The Company reserves the right to change specifications without notice. Pictures are not contractual.

# Facility management made effortless

When you're in charge of keeping floors clean, it's important to have washers and dryers that can handle large volumes of mop heads and meet excellent hygiene standards.

## When you have to ...

- ▶ clean floors to high standards
- ▶ wash large volumes of mops
- ▶ trust in total hygiene
- ▶ depend on reliable, long-lasting machines

...we give you washers and dryers that exceed your expectations.

## Ease of use

Highly intuitive interface and ergonomic benefits to reduce strain for a demanding job.

## Saves money

Very quick and cost-efficient to install, with extremely low energy and operating costs over time.

## Adapts to your needs

Washers and dryers are stackable and take up surprisingly little room. Delicate treatment of mop heads to enhance their service life.

# Washers. Simply easy, for you and your staff

## User-friendly detergent dispenser

Even with manual dosing, the process is easy and your results will be perfect. The front loaded **detergent dispenser** is placed at the correct height and tilts downward for good visibility. Six color-coded compartments **show you what to pour where**.

## Avoid overloading and underloading

With **Integrated Savings** to measure and display the load in real time, you can avoid overloading and underloading, for optimized productivity. You'll also get the wash results you need and extend the lifetime of your washer.

## Exceptional savings with Intelligent Dosing

According to the weight load, the precise amount of **detergent is added automatically**, removing the guesswork and avoiding waste for consistent results every time. Mops can be impregnated directly in the washer, again according to weight, to prepare them for the next round of cleaning.

## Flexible programs for longer-lasting mops

Set your own customizable programs and get data reports for each program you use. Copy between 2 different capacities: all parameters of the wash program will be adapted automatically.

# Dryers. Better in every way

## Dry more in less time

Whether you choose the smaller or the larger models, you'll dry large volumes in surprisingly little time.

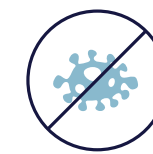

## New technologies for major savings

With our improved heat pump technology, **you can save up to 60% on energy bills** compared to traditional dryers, without compromising on time and productivity. Install anywhere!

## Dry not overdry

**Measures the exact moisture level** throughout the drying process so mops will never be left damp and prone to bacterial growth. Saves energy by stopping as soon as mops are dry, which also protects them and helps them last longer.

## Clean and hygienic

Proper cleaning and drying means perfect hygiene for your customers' floors.

## Certified Ergonomics

The new range of washers and dryers has passed third party external testing and is **certified to international standards of ergonomics** and human-centered design. These products have earned the prestigious 4-star rating for ergonomics. This means they have been user-tested to make sure your operators will feel less tension and strain, so they—and your business—can thrive.

## Complete Data Access

With connected machines, facility managers will benefit from **clear insight into the most efficient operational flow** of the laundry process.
