

ID Box

Easy savings with 3rd party pumps

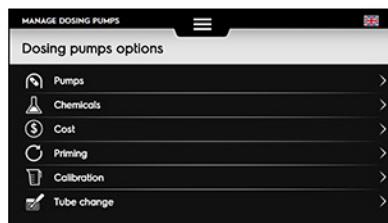

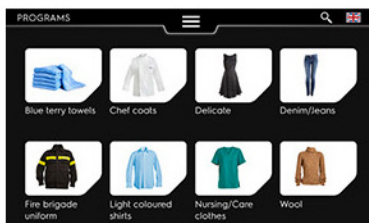

Features and benefits

Intelligent Dosing interface – ID Box is the solution for still achieving chemical savings with external 3rd party pumps. Getting all the benefits as you should have gained using Jetsave and Dosave by driving those pumps in relay mode

- **ClarusVibe:** Washer extractors with Clarus Vibe control.
- **Save on chemicals:** Impossible to avoid chemical savings, never overuse chemicals again.
- **Easy installation:** Plug & play connection from washer extractors. No need to open the panels for wiring.
- **Easy programming:** All is managed by Clarus Vibe from washer extractors in ml/kg.
- **Flexible pumps extension:** Available for 2, 3, 4, 5 products, while if more needed, easily fit up to 15 pumps via modular extension.
- **Low level alarm:** Always a step ahead when the chemical is running low. A warning message appears on the Clarus Vibe screen.
- **Statistic management:** All dosing reports/stastics can be downloaded directly from the washer extractor and easily monitor the savings.

Main options

- Extension power- and data cable (6 m) between the unit and washer extractor. (Max extension in total is 15 m).
- Single low level probe for chemical running low alert.
- Industrial wand probes for 3 pumps delivery with low level alert.
- Possible to add more signals with easy add on kits.

Power supply	
From the washer extractor	220-240V- 50/60 Hz, 3A (Max.)
From the external power supply	100-240V- 50/60 Hz
