

EDS - Efficient Dosing System 24VDC interface

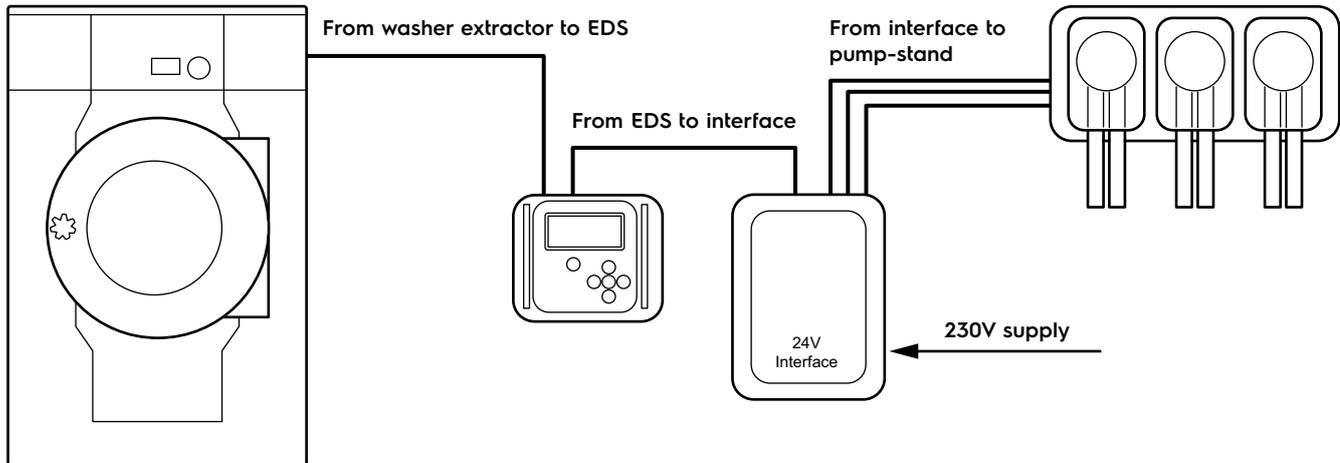

Product description

The 24V interface is particularly designed to connect Electrolux efficiency dosing controller to almost any existing pump in different installations. With this perfect solution, It will also allow all the customers to start a huge detergent saving immediately

Features and benefits

- Optimize the detergent dosing by connecting EDS to existing pump stands and save on detergent
- Will control any dispenser that accepts 24V signals with relay mode setup
- Easy connection from the washer extractor to the Efficient Dosing controller by one single cable
- Allow to connect to up to 6 pumps on one washer extractor

Installation schematics

Note!

Efficient dosing interface supplies signals in 24V with a maximum power of 230mA.
 If the pumps require more than 230mA, relays have to be installed, which are not supplied in the kits
 Efficient dosing controller is suggested to be purchased together for this application

PNC	988916941	988916937
Description	24V Efficient Dosing Interface	Efficient Dosing controller without pumps
Dimensions	H: 150 mm x W: 100 mm x D: 60 mm	H: 119 mm x W: 132 mm x D: 65 mm
Weight	0.8 kg	0.13 kg
Supply voltage	230V	N/A
Output	24V	N/A
