

# Fire brigade Drying cabinet instructions

## Loading the cabinet

**1** It's a good idea to hang the parts of your work outfit on the same hanger. Begin by hanging the trousers, and then hang the jacket. Then slide in the hanger onto the proper opening in the ceiling of the drying cabinet.

**2** Close the door and press one of the program buttons to start the drying. For energy-efficient drying, run the machine fully loaded, and **do not open the doors** of the drying cabinet during the drying process.

## Programs

**Automatic drying program at 60 °C**  
for padded garments

**Automatic drying program at 75 °C**  
for impregnation of Gore-Tex, protects the garment on the next occasion of use.

**Shoe / glove dryer leather/skin material**  
For drying shoes and gloves made of leather.

**Shoe / glove dryer synthetic material**  
For drying shoes and gloves made of synthetic material.

**Flat drying**  
For drying various equipment such as helmets, breaching masks, etc.

## Cleaning of filter

Remove the lint from the filter in the top of the drying cabinet when you are finished drying.

If the cabinet overheats, it will stop, and can be restarted after 10-15 minutes. Clean the filter at the top of the cabinet.
