Main Features

- Large storage area suitable to contain 2/1 GN grids or shelves on anti-tilt runners.
- Operating temperature can be adjusted from -2 to +10 °C to suit different food storage requirements.
- Cabinet fitted with up to 75 mm thickness of cyclopentane insulation for best insulating performance with 100% environmental protection (thermal conductivity: 0,020 W/ m*K).
- Automatic evaporation of the defrosting water by hot gas on the top for energy saving.
- Provided with stainless steel A304 grids.
- Interior LED light to save energy and for best internal visibility.
- Internal structure with numerous charging positions available to host grids, ensuring higher net capacity and a greater storage space.
- Intelligent door frame heater, activated according to external temperature, avoids condensation build-up around the door frame.
- 60 mm-thick insulation covering the evaporator can be easily removed with a single operation.
- Removable triple-chamber balloon magnetic gasket to improve insulation and reduce energy consumption and ease of cleaning.
- Improved defrost and evaporator fan management – defrost type changes with temperature set-point: electric below +2° C while air convection defrost above +2°C, thus saving energy.
- Airflow: back to front forced air flow and removable air conveyors provide even temperature distribution and fast cooling in any conditions.
- Large external LCD touch display features the following benefits and advanced electronic functions:
 - Cabinet temperature indication
 - 5 selectable preset and 2 programmable food categories to set the appropriate temperature and humidity level, according to the type of food stored
 - HACCP: acoustic and visual alarms are activated when temperature exceeds critical limits. Up to 99 events are recorded and stored
 - IQ Defrost4: defrost cycle driven by 4 probes and activated only when ice in the evaporator is detected
 - Failure indication: history of alarm events and performances of the last 48h of operation are stored in case of probe failure
 - Diagnostic: four probes constantly control the working conditions of the appliance
 - Turbo cooling cycle to rapidly cool warm loads
- Tropicalized unit (43°C ambient temperature).
- This appliance is intended for use in ambient temperatures up to 40°C.

EU energy labelling from 1st July 2016

The European energy labelling scheme for professional refrigerators and freezers is based on requirements setting Minimum Energy Performance standards for commercial refrigeration cabinets sold within the EU. These requirements are designed to drive energy efficiency and environmentally friendly approach for professionals. The European energy labelling scheme will apply to all manufacturers and importers who sell and market products within the EU and it is mandatory across Europe.

Important: all products which consume energy above the minimum level will not be able to be sold within the EU from 1 July 2016.
