GH2 WITH BACKLIT FRONTAL PANEL

LED Lights

GH2NEW

Ref: 562949
(GH2NEW)

Hot beverage dispenser, 2 flavours

General Features

Compact, light-weight and designed for dispensing hot drinks, GH2 is the hot beverage dispenser, perfect for all types of water-soluble preparations: tea, infusions, herbal teas, chocolate, barley, ginseng and much more.

GH2 dispenses up to 2 flavours and with 2 options: small or large cup.

Design and functionality are the key features in this equipment.

DESIGN: The backlit front panel increases the appeal of the machine, and can be customized with graphics (subject to negotiation).

The light effect draws attention and amplifies the visibility of the equipment, maximizing impulse purchases.

FUNCTIONALITY: GH2 is user-friendly, thanks to the fully removable powder containers and the new sliding door for filling the water tank.

The GH2 has an internal anti-scale filter, which has an expected life of 900 litres; and has an internal device that sucks any steam to preserve the quality of the soluble products.

A warning system signals the user when the water in the tank reaches the minimum level and a refill is needed.

The system warns when it is necessary to clean the dispensers, through a simple button, to ensure the perfect delivery every time.
