e-XP OptiOil Fryer HP, 2x10-lt, electric, free standing, 2 wells (internal heating elements), 2 baskets and lid included

### Short Form Specification

Item No. \_\_\_\_\_

The OptiOil Fryer is engineered for performance, efficiency, and ease of use and maintenance. A large digital display provides clear indication of temperature and operating status. All key components are front-accessible, and the well features rounded corners for easy cleaning. The unit's right-angled side edges allow flush alignment with adjacent equipment, preventing dirt accumulation. Constructed from AISI 304 stainless steel with Scotch Brite finish, it includes a one-piece 1.5 mm pressed worktop, height-adjustable stainless-steel feet, and IPX4 water protection. Oil drains through a front tap into a collection container beneath the well. The fryer features high-performance internal heating elements for fast heat transfer and stable temperature control up to 185 °C. Heating elements can be lifted for easy cleaning. Integrated oil filtration with a dedicated pump for each well, predisposed for an Advanced Filtering System with paper filters to extend oil life. Additional features include reduced-power fat-melting mode, standby function for energy savings, oil level alert, and manual-reset overtemperature protection. An optional oil quality monitoring tool (code 9B8081) supports precise oil management. The OptiOil Fryer is compliant with Swiss Energy Efficiency Ordinance (730.02) and designed to minimize oil consumption, ensuring reduced operating costs and consistent frying performance.

### Main Features

- OptiOil Fryers are designed to optimize oil usage - compared to a traditional internal heating elements fryer - ensuring lower running costs.
- High Performance Internal Heating Elements engineered to provide rapid heat transfer and stable temperature control, ensuring fast preheating, high productivity and consistent frying conditions.
- AISI 304 heating elements located inside the well can be lifted up for easier cleaning.
- Large visible digital display showing temperature, on/off status of the appliance and on/off status of the heating elements.
- Oil Level Alert prompts the operator to refill oil, maintaining consistent frying performance.
- Reduced power setting to melt solid fat.
- Integrated oil filtering system with a pump for each well for oil circulation.
- The unit is predisposed for ADVANCED FILTERING SYSTEM with paper filters to remove the smallest food residuals and extend the oil life.
- All major compartments located in front of unit for ease of maintenance.
- Oil drains through a tap into a drainage container positioned under the well.
- Safety systems protect against overtemperature and can be manually reset.
- Electronic thermostatic regulation of oil temperature up to a maximum of 185 °C.
- Unit to be mounted on height adjustable feet in stainless steel.
- Optional portable oil quality monitoring tool (code 9B8081) for efficient oil management.
- Supplied as standard with 2 baskets and 2 doors.

### Construction

- All exterior panels in Stainless Steel with Scotch Brite finishing.
- Model has right-angled side edges to allow flush fitting joints between units, eliminating gaps and possible dirt traps.
- One piece pressed 2 mm work top in Stainless steel.
- Interior of well with rounded corners for ease of cleaning.
- 2 separate wells for versatile frying.
- IPx4 water protection.

### Sustainability

- This model is compliant with Swiss Energy Efficiency Ordinance (730.02).
- Standby function for energy saving and fast recovery of maximum power.
