Short Form Specification

Item No. _____

AISI 304 stainless steel construction with AISI 316 stainless steel deep drawn pan with rounded edges; motorised tilting; vessel can be tilted beyond 90° to completely empty the food. Ergonomic and user friendly thanks to the high tilting position. Heavy duty, balanced stainless steel lid with sliding plastic cover to insert ingredients. Food is uniformly heated through the base and side walls of the pan by an indirect heating system. Food sensor, placed on the bottom of the vessel, provides efficient temperature control even with small amounts of food. Automatic water filling makes possible to preset the desired quantity of water and the curved pan base guarantees that the appliance is also suitable to prepare small quantities of food. Electronic control with possibility to store up to 50 programs, large display for easy use and a complete control over the functions. Speeds from 20 to 100 rpm, with special program "Whipping" cycle up
