

Drop-In
Drop-in bain-marie, air ventilated, with
one well (2 GN container capacity) and
A overshelf

ITEM # _____

MODEL # _____

NAME # _____

SIS # _____

AIA # _____

341159 (D03H2O)

Drop-in Bain-Marie, air ventilated, with one well (2 GN container capacity) with one A type overshelf and halogen lamp

Short Form Specification

Item No. _____

Suitable for GN 1/1 containers with a maximum height of 150 mm. Designed to serve the food in gastrorm containers. Well in 304 AISI stainless steel with rounded corners to facilitate cleaning operations. The well is also equipped with a drain hole. 19mm thick rock wool isolated with galvanize sheet guarantees excellent well insulation to reduce energy dispersion. A constant flow of hot air circulating through the containers guarantees the correct food temperatures. Temperature uniformity and fast warm up time are guaranteed thanks to heavy duty armored heating elements and powerful radial booster fans. Cylindrical stainless steel air diffusors provides a constant air circulation. The system operates without water and ensures energy efficiency when compared to standard bain-marie heating. Food introduced at the correct temperature maintains its core temperature according to Afnor Standards. Stylish A type overshelf designed for extra increased visibility on the surface for charming food display. Overshelf equipped with hot halogen lamps.

Main Features

- Electronic overheating protection.
- Suitable for GN 1/1 containers with a maximum height of 150 mm.
- Wells in 304 AISI stainless steel with drain holes and pipes and with rounded corners to facilitate cleaning operations.
- CB and CE certified by a third party notified body.
- Designed to serve the food in gastrorm containers.
- Precise temperature control and setting at 0,1°C .
- As standard the product comes with digitally controlled thermostat which is in line of HACCP norms and provides visual alarm as a warning of the increasing or decreasing temperatures.
- It is possible to transform one of the GNs to soup dispenser with the available accessory.
- A constant flow of hot air circulating through the containers guarantees the correct food temperatures. Temperature uniformity and fast warm up time are guaranteed thanks to heavy duty armored heating elements and powerful radial booster fans. Cylindrical stainless steel air diffusors provides a constant air circulation.
- Since the water is not needed to heat the well, the system guarantees easy of use and maintenance: there is no calcification of the resistances.
- No need extra connections for water, less work during installation/maintenance.
- Food introduced at the correct temperature maintains its core temperature according to Afnor Standards.
- Stylish A type overshelf designed for extra increased visibility on the surface for charming food display.
- Overshelf equipped with hot halogen lamps.
- Designed to be positioned in flush installation providing improved cleanability and suitable for modern design installations.

Construction

- IPx4 water protection.

APPROVAL: _____

- Well in 304 AISI stainless steel with rounded corners to facilitate cleaning operations. The well is also equipped with a drain hole.
- Electronic control with temperature display.
- Overshelf in complete AISI 304.

Sustainability

- 19mm thick rock wool isolated with galvanize sheet guarantees excellent well insulation to reduce energy dispersion.
- 90% fast preheating phase and no need for water (as traditional bain marie), reduces energy and no water consumption.
- The system operates without water and ensures energy efficiency when compared to standard bain-marie heating.
- No water consumption means less operating costs.
