

Warewashing green&clean multi-rinse Rack Type, Ventless heat pump, ZERO LIME Device, electric, 200r/h,left>right

535007 (EMR20NELV)

Multi Rinse Rack Type Dishwasher, 200 racks/hour, electric, Left>Right, ventless heat pump, medium prewash, constant rinse, self cleaning, ZERO LIME Device, CLEAR BLUE Filtering System, WASH-SAFE CONTROL, touch screen, variable speeds, insulated doors, W

Short Form Specification

Item No.

Unit to be multi-rinse rack type dishwasher. Operating direction left to right or right to left. Featured built-in Ventless Heat pump captures energy from the extracted air to heat up incoming cold water to wash tank and boiler. ZERO LIME device automatically de-scales the whole hydraulic circuit and all washing & rinsing chambers. Multi-rinse area with built-in Wash-Safe Control system and rinse booster pump augrantees constant rinse pressure. CLEAR BLUE filtering system removes majority of soil from the wash water to ensure clean water for long time. Included medium pre-wash zone works with cold water of max. 40°C. Maximum Water Contact (MWC) wash arms are positioned along the full length of the wash tank. Powerful wash pump and specially designed wash spray arms guarantee cleaning. Washing is done with water circulating at 55-65°C. Final rinsing is done with clean water heated up to 85°C that is re-used in several phases in pre-rinse at around 70°C. Multi-rinse with double rinse tanks and multi rinse arms re-uses rinsing water several times to ensure hygiene on washed wares. Constant 0.4 liter/ rack rinse water consumption of cold water in any conveyor speed. Three conveyor speeds are selectable by the operator, one for maximum capacity, one compliant to DIN 10510 and one certified according to NSF/ANSI 3. Intuitive touch screen control panel provides easy communication on different levels. Easy drain of water done through control panel. Standard end of the day self cleaning cycle and sanitation cycle both including internal side of the door. Modularity allows split delivery, customization and upgrade on-site and over time.

Main Features

- CLEAR BLUE filtering system removes soil from the wash water providing cleaner water and highly active detergent thus ensuring better washing performance and lower running costs.
- Built-in WASH-SAFE CONTROL system raises water temperature to 85°C to sanitize the rinse water. No external boiler is required. Built-in air break and rinse booster pump ensure constant temperature and pressure throughout the rinsing cycle regardless of the inlet water condition.
- Deep drawn pressed wash tank with fully rounded corners, sloped towards the drain to prevent dirt build up provides fast drainage in only a few minutes. Pressed wash tank with no welded points offer a guaranteed water tight solution.
- Maximum capacity per hour of 200 racks easy to switch to DIN 10510 or NSFANSI 3 compliant speed.
- Three conveyor speeds can be selected through the control panel by the operator and customized on site.
- Pre-wash section uses cold water so food remains are not "baked" onto the plates in order to have better pre-wash performance.
- Maximum Water Contact (MWC) wash arms are positioned along the full length of the wash tank.
- Multi-rinse arms in combination with double rinse tanks re-use final rinsing water in several phases to ensure hygiene and complete detergent removal on the washed wares.
- Built-in drain valve in the tanks allows automatic dump and fill to refresh the water in the tank without any interruption of the washing process.
- Intuitive touch screen control panel features userfriendly display to easily operate the machine and to monitor machine status. Three different levels of interaction are available each show relevant messages and information to the operator, the general maintenance staff and the authorized service partners.
- Automatic drain, clean and sanitize cycles featured as standard. The internal chambers, including the internal doors are completely cleaned or sanitized avoiding bacteria proliferation for maximum hygiene and reducing manual work/ time for operator.
- Self-draining wash pumps provide maximum hygiene and all wash and rinse zones drain automatically at the push of a button.
- All internal components: wash and rinse arms, tank filters, curtains can be easily removed for cleaning.
- IP25 protection against water jets, solid objects and small animals (larger than 6 mm).
- Large counter balanced inspection doors allow unrestricted all-round access to the wash and rinse area. Door is insulated with injected foam. This adds strength as well as reduces noise and heat loss.
- Adjustable feet for full access underneath the machine for cleaning.
- Splashhoods at both entrance and exit avoid water spilling outside the machine.
- Unit equipped with USB port making it simple to

read data such as machine identification, counters and consumption, components, devices and alarm logs. Included Accessories Machine parameters can be uploaded and downloaded and firmware updated.

 Automatic back-up mode is activated when a failure occurs. Guided troubleshooting for fast fixes including 300 precises notifications and 23 easy-to-follow processes.

Construction

- Modularity design allows the machine not only be disassembled for delivery and re-assembled at customer's site, but also to be customized and upgraded on-site and over time.
- All main components made in heavy duty anti-corrosive 304 type stainless steel: external front, side panels and internal chambers, wash and rinse arms, doors and rack transportation system.
- Dishwasher structure is held together with a solid 50 x 50 mm stainless steel frame to provide long-term sturdiness.
- All electric components are put in one IP65 central box isolated from water and steam to ensure high reliability.
- External pre-arrangement for inlet water, drain water, detergent & rinse aid connections for fast and easy installation on both sides of the unit.
- The unit is built on modularity concept for easy to add prewash, wash and up to 2 dryer modules onsite.
- Table-to-table length, 2340mm.

Sustainability

- Built-in Ventless Heat Pump transfers the heat captured from the extracted air to heat up incoming cold water to both fill the water tank and rinse, thus saving significantly energy. The humidity, volume and temperature of the exhaust air is reduced dramatically at the same time so no ventilation hood is needed for the machine (depending on local regulation and condition in compliance with VDI 2052).
- ZERO LIME Device as a fully automatic cycle ensures total scale removal from the boiler, the hydraulic circuit, the washing chamber and the rinsing chamber allowing ultimate performances and lower energy consumption thanks to highly efficient heating elements.
- Multi-rinse technology guarantees rinse water consumption of 0.4 liters/rack regardless of the conveyor speed to ensure low energy, water, detergent and rinse aid consumption.
- All chambers without internal pipes and therefore no hidden dirt traps.
- Auto-start/stop equipped in different zones ensures that the zone runs only when a rack is passing through it. This reduces water, energy, chemical consumption and noise.

Included Accessories		
 1 of Kit delime for rack type 	PNC 865282	
 1 of Kit water meter 	PNC 865286	
Optional Accessories		
 Medium hot air blower zone without door for green&clean Multi Rinse Rack Type Dishwasher 	PNC 534056	
 Corner drying zone for green&clean Multi Rinse Rack Type Dishwasher 	PNC 534057	
 Medium pre-wash zone for green&clean Multi Rinse Rack Type Dishwasher with Ventless Heat Pump, ZERO LIME Device, WRAS/Watermark approval 	PNC 535033	
• Large pre-wash zone for green&clean Multi Rinse Rack Type Dishwasher with Ventless Heat Pump, ZERO LIME Device, WRAS/Watermark approval.	PNC 535035	
 Medium drying zone with door for green&clean Multi Rinse Rack Type Dishwasher 	PNC 535038	
 Large drying zone with door for green&clean Multi Rinse Rack Type Dishwasher 	PNC 535039	
 Kit to adapt motorized table with green&clean Rack Type - Europe, UK, M.E., Africa, Asia, Latin America, Oceania 	PNC 865232	
 Inclined extension table for roller conveyor 	PNC 865253	
 Inclined extension table for splash hood 	PNC 865254	
 Kit to convert pre-wash module to wash module 	PNC 865281	
 Kit water softener for Rack Type dishwasher 	PNC 865284	
 Kit electronic connection for motorized table and remote pre-wash module 	PNC 865290	
 Kit of splash panel to change on the splash hood for 90° and 180° curve table 	PNC 865291	
 HACCP cable connection for Rack Type dishwasher 	PNC 865490	
• Kit water softener and reverse osmosis for Rack Type Dishwasher	PNC 865494	
Ethernet board (NIU-LAN) for green&clean Rack Type Dishwashers	PNC 922696
