- Large storage area suitable to contain
- Connectivity ready for real time access to connected appliances from remote and data
- Large digital white-digit display with cabinet temperature display and setting and turbo frost
- Fully compliant HACCP digital control: when temperature exceeds critical limits, acoustic and visual alarms are activated. Up to two
- Optimized airflow within the chamber guarantees uniformity of temperature on all
- Hidden evaporator thus guaranteeing higher storage capacity and less corrosion problems.
- Greater storage space: internal structure with numerous charging positions available to host grids, ensuring higher net capacity.
- Model requires only 1 phase 230V/50Hz supply and can be plugged straight into an existing
- Prearranged to fit RS485 port to facilitate connection to a remote computer and
- Complies with main international certification
- Self closing and on site reversible left/right
- This appliance is intended for use in ambient
- Stainless steel AISI 304 external panels
- Inner cell with rounded corners, bottom
- Stainless steel runners and supports easily
- Internal components removable without the use of tools to facilitate cleaning operations.

Supplied with N. 6 grids 720x540 mm.

EU energy labelling from 1st July 2016 The European energy labelling scheme for professional

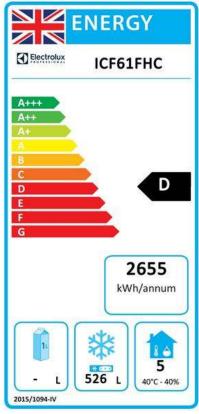

The European energy labelling scheme for professional refrigerators and freezers is based on requirements setting Minimum Energy Performance standards for commercial refrigeration cabinets sold within the EU. These requirements are designed to drive energy efficiency and environmentally friendly approach for professionals. The European energy labelling scheme will apply to all manufacturers and importers who sell and market products within the EU and it is mandatory across Europe. Important: all products which consume energy above the minimum level will not be able to be sold within the EU from 1 July 2016.

SI 2020 No. 1528.
