AIA #	

Main Features

- Easy cleanability guaranteed by an automatic system: the cleaning switch activate the circulation and the rinse of water; at the end of the cycle just swithed again to start producing ice.
- The ice making method guarantees a continuous and reliable production.
- The ice-making method (spray layering) guarantees crystalline, compact, hygienically pure ice cubes that are resistant to melting.
- Water consumption and productivity calculated using 15°C water temperature and 21°C ambient
- Compact dimensions of the ice cubers make them highly suitable for any location, particularly those where space is at a premium.
- Fully automatic in operation.
- Rounded internal corners of the bin assure ease of
- Food grade ABS interior.
- Suitable for gravity drain only.
- Compliant to CE requirements for safety.
- Ice cube pyramid-trunk shape.
- The innovative anti-scale spray system with flexible nozzles avoids limescale deposits through small
- Reliability guaranteed by the quality of the construction materials used (front, top and sides in 304 AISI stainless steel) and the sophisticated product and process technology involved.
- The sprayers are easy to take away, permit a simple flowing and prevent limestone formation.
- AISI 304 stainless steel exterior.
- Aluminium evaporator ensures a safe contact with
- Sturdy door opening system made in AISI 304
- Internal ice containers in ABS.
- Hygienical plastic spray arms removable without the use of tools.
- Supplied with flexible water supply, drain hoses and
- Easy access to the main components for
- ON-OFF rocker switch.
- Delivered with UK plug.

APPROVAL:

Sustainability

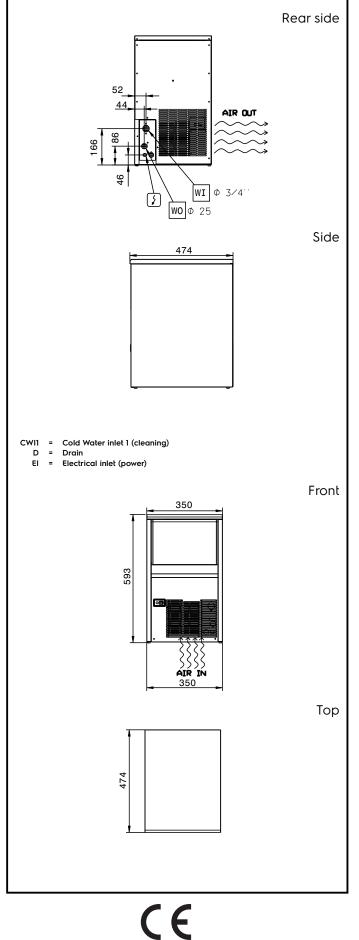

- Hydrocarbon refrigerant gas R290 for the lowest environmental impact (GWP=3) CFC and HCFC free.
- Reduced energy consumption by fully insulated storage bin.
