

Ventilation Equipment Odour reduction hood for 6 & 10 GN 1/1 electric lenghtwise combi ovens

		 Main Feature Filtering surface No need for an eliminating carp Complete ventile the need for ar connection. UV system attack unpleasant odo restrain the resion ozone. Fan motor with 3 - Low speed why closed; Medium speed is open; High speed why easy to remove of the system attack and the oven is in cleaning phase.
922718 (HOOT11E)	Odour reduction hood with fan for 6 & 10 GN 1/1 electric ovens	the oven makes between them. (oven's software power and odo oven activity.
Short Form Specification <u>Item No.</u> -Constructed in 304 AISI stainless steel - Steam condensation device - Equipped with labyrinth filters in 304 AISI stainless steel (positioned on front), condensation filter and extra droplets separator acting as a steam- liquid separator; UV system attacks the fat molecules eliminating unpleasant odours and bacteria; catalyst filter restrain the residual odours and no reacted ozone. - Built-in fan which automatically controls the air capacity according with the quantity of steam produced - The frontal ventilation is activated when the door of the oven is opened and thanks to a direct software connected to the oven, the hood		 hood switches of stops; based of automatically of power for odour Can be used wit LW combi ovens Double step do suggested to im Construction Constructed ent Automatic door Multiple filtration - prefiltering of esteel lobyright filtration
automatically activates fan pow activity	er and odor absorption based on real oven	steel labyrinth fil - condensation separator acting - UV system eliminating unple - catalyst filter re no reacted ozor • Developed and 14001 and ISO 5 • Must be installe aeration, accord

ain Features

- tering surface protects against fire hazard.
- o need for an external exhaust pipe, thus minating carpentry costs.
- omplete ventilation system which eliminates e need for an exhaust duct with external onnection.
- v system attacks the fat molecules eliminating pleasant odours and bacteria; post-filters strain the residual odours and no reacted one.
- an motor with 3 automatic speeds:
- ow speed when door is closed and valve is osed;
- Aedium speed when door is closed and valve open;
- High speed when door is open.
- ontal labyrinth and condensation filters are asy to remove and cleanable in a dishwasher.
- ossibility to activate air purification system hen the oven is in stand by (not cooking) or cleaning phase.
- e cable connection between the hood and e oven makes possible the communication etween them. Connection of the hood to the en's software automatically activates fan ower and odour absorption based on real en activity.
- he hood and the oven are synchronized: the bod switches On/Off when the oven starts/ ops; based on real oven activity the hood utomatically activates Hi/Medium/Low fan ower for odour absorption.
- an be used with 6 GN 1/1 and 10 GN 1/1 electric V combi ovens.
- ouble step door opening (PNC 922265) is ggested to improve filtering performance.

nstruction

- onstructed entirely in 304 AISI stainless steel.
- utomatic door opening activation system.
- ultiple filtration systems: prefiltering of exhaust steam through stainless eel labyrinth filters;

condensation filter and extra droplets parator acting as a steam-liquid separator; UV system attacks the fat molecules minating unpleasant odours and bacteria; catalyst filter restrain the residual odours and o reacted ozone.

- eveloped and produced in ISO 9001, ISO 001 and ISO 50001 certified factory.
- ust be installed in a space where normal eration, according to regulations, is present.

Ventilation Equipment Odour reduction hood for 6 & 10 GN 1/1 electric lenghtwise combi ovens

• System guarantees correct suction as well as high energy saving.

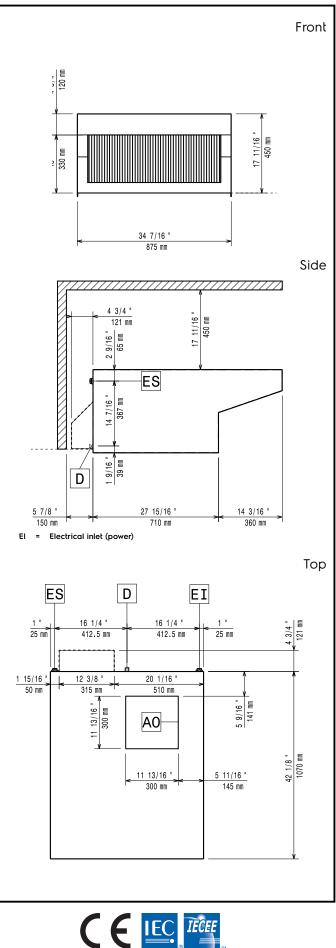

Ventilation Equipment Odour reduction hood for 6 & 10 GN 1/1 electric lenghtwise combi ovens
