Single Rinse Rack Type  
Dishwasher with Medium  
Dryer, 100 racks/hour,  
electric, touch screen,  
insulated doors, customized  
direction on-site, 50Hz

### Short Form Specification

#### Item No. \_\_\_\_\_

Unit to be single rinse rack type dishwasher. Single rinse with built-in stabilized pressure valve ensures the right rinsing pressure for optimum hygiene results. Maximum Water Contact (MWS) wash arms are positioned along the full length of the wash tank. Powerful wash pump and specially designed wash spray arms guarantee cleaning. Washing is done with water circulating at 55-65°C. Final rinsing is done with clean water heated up to 85°C. Low rinse water consumption of 1.5 liters per rack at maximum speed of 100racks/hour. Equipped medium dryer provides dry dishes using both internal and external air. One conveyor speed of 100racks per hour. Intuitive touch screen control panel provides easy communication on different levels. Large counter-balance door has heat and noise insulation with easy internal access. Operating direction of the machine is decided by customer on-site depending on the layout flow with pre-arranged right to left from the factory.

### Main Features

- Electronically controlled to optimize drying results.
- Drying zone removes most of water from the crockery through a high powered fan that extracts dry air from outside mixing it with the internal air, thus providing dry plates at a temperature cool enough to handle safely.
- Adjustable feet for full access underneath the machine for cleaning.
- IP25 protection against water jets, solid objects and small animals (larger than 6 mm).
- Intuitive touch screen control panel features user-friendly display to easily operate the machine and to monitor machine status. Three different levels of interaction are available each show relevant messages and information to the operator, the general maintenance staff and the authorized service partners.
- All internal components: wash and rinse arms, tank filters, curtains can be easily removed for cleaning.
- Unit equipped with USB port making it simple to read data such as machine identification, counters and consumption, components, devices and alarm logs. Machine parameters can be uploaded and downloaded and firmware updated.
- Maximum capacity per hour of 100 racks.
- Large counter balanced inspection door allow unrestricted all-round access to the wash and rinse area. Door is insulated with injected foam. This adds strength as well as reduces noise and heat loss.
- One conveyor speed can be selected through the control panel by the operator.

### Construction

- Deep drawn pressed wash tank with fully rounded corners, sloped towards the drain to prevent dirt buildup, provides fast drainage in just a few minutes. With no welding points the pressed tank offers a guaranteed water tight solution.
- Dishwasher structure is held together with a solid 50 x 50 mm stainless steel frame to provide long-term sturdiness.
- All electric components are put in one IP65 central box isolated from water and steam to ensure high reliability.
- External pre-arrangement for inlet water, drain water, detergent & rinse aid connections for fast and easy installation on both sides of the unit.
- All main components made in heavy duty anti-corrosive 304 type stainless steel: external

**APPROVAL:** \_\_\_\_\_

front, side panels and internal chambers, wash and rinse arms, doors and rack transportation system.

- The chamber is pressed with fully rounded corners without internal pipes and therefore no hidden dirt traps.
- The feeding direction is right to left as pre-arrangement from the factory, but it can be simply reversed on-site to left to right.
- The unit is built on modularity concept for easy to install on-site.

## Sustainability

- Built-in stabilized pressure valve ensures constant pressure throughout the rinsing cycle regardless of inlet water pressure.
- Auto-start/stop equipped in different zones ensures that the zone runs only when a rack is passing through it. This reduces water, energy, chemical consumption and noise.
- Single rinse with stabilized pressure valve guarantees rinse water consumption of 1.5 liters/ rack regardless of inlet water pressure to ensure low energy, water, detergent and rinse aid consumption.
- Self-draining vertical wash pumps provide maximum hygiene.
- Automatic back-up mode is activated when a failure occurs. Guided troubleshooting for fast fixes including 150 precises notifications and 23 easy-to-follow processes.

**Electric**

Supply voltage:	380-415 V/3N ph/50 Hz
Default Installed Power:	29.6 kW
Boiler heating elements:	12 kW
Wash pump size:	1.18 kW
Wash tank heating elements:	12 kW

Rinse water consumption at max speed (l/rack):	1.5 lt/rack
Rinse water consumption at max. speed (l/h):	150 l/h

**Water:**

The higher the temperature, the faster the warm up. When there is ESD option installed, the machine should be connected to cold water up to 30°C.

When below 7°FH/4°dH special detergent and rinse aid are needed.

**Inlet hot water line size:**

**Inlet cold water line size:** G 3/4"

**Drain line size:** 50mm

**Inlet water supply pressure:** 1.5-7 bar

**Inlet water supply temperature (wash and rinse):** 50 - 65°C

**Inlet water supply hardness:** 0-14 °fH / 0-8°dH

**Flow rate of wash pump:** 400 l/h

**Peak rate of drain flow:** 2.5 l/s

**Flow rate of wash pump:** 400 l/min

**Wash tank size:** 70 l

**Key Information:**

For transportation purpose only, the depth can be reduced to either 890mm by removing the main switch button or 792mm by removing the control box and the door handle.

**Latent heat:**

CC0ECC (ESR10E5D) 8800 W

**Sensible heat:** 7500 W

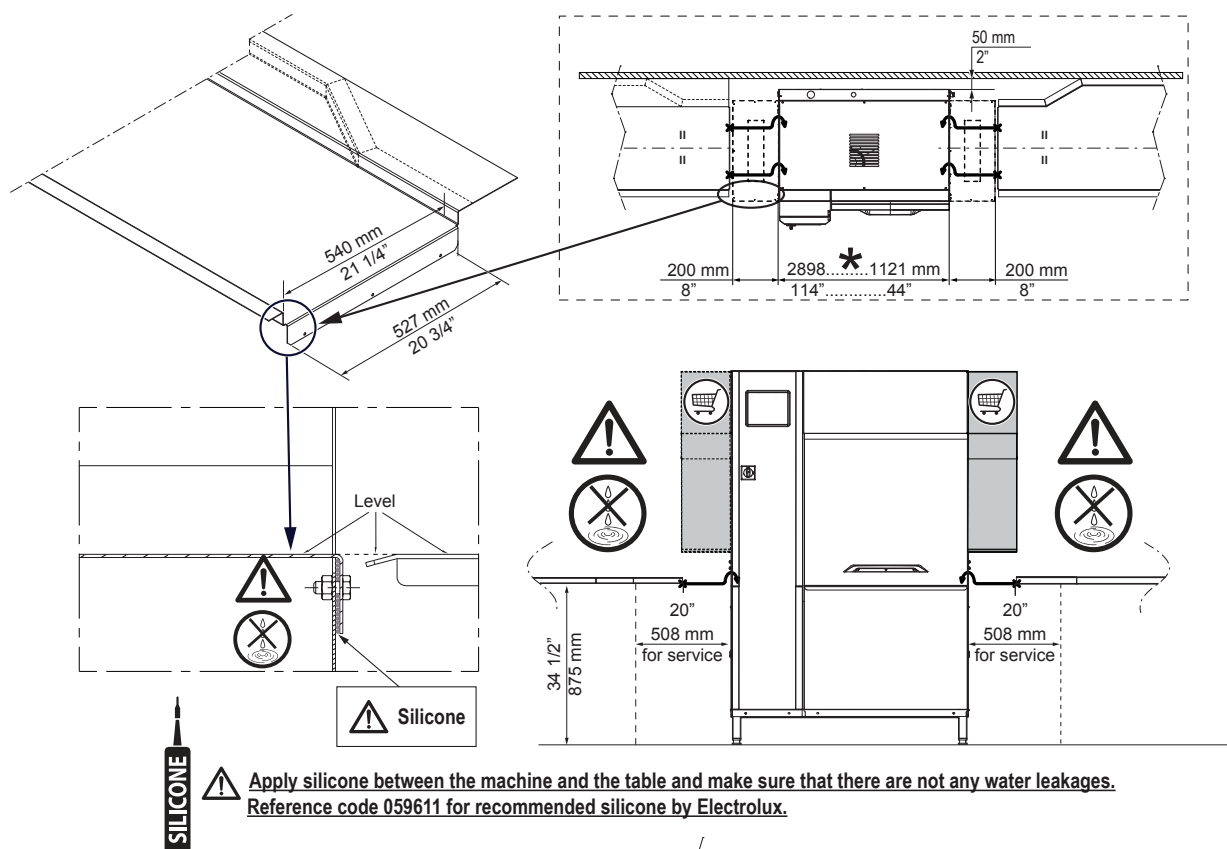

**Air flow:** 107 m³/h

**Air temperature (top, exit):** 45 °C

The data is measured at exhaust points at 25°C and 60% r.h. ambient conditions, 18°C inlet water temperature and refer only to the machine.

This model requires a ventilation hood. Please refer to the attached "Recommended Exhaust Hood Design".

## RECOMMENDED TABLE CONNECTION

All tables must be connected to the dishwashing units according to local regulations and industry standards which may differ from the recommendations herein suggested. Electrolux Professional is not liable for any failure in complying with local design standards.
