

Water Treatment Filter for Total Demineralization

ITEM # _____

MODEL # _____

NAME # _____

SIS # _____

AIA # _____

864367 (TOTALDEMI5)

Filter for total demineralization

Main Features

- Can be used with up to 60°C water temperature.
- Operating pressure between 2 and 6 bars.
- 300 liters/hour nominal flow rate.
- Use of demineralized water increases the life of the unit and reduces the need for descaling.
- Fast and easy filter cartridges replacement.
- In total demineralization filter (BRITA PURITY 1200 Clean Extra) three layers ion exchangers' structure, guarantees elimination of all salts in the water, preventing them from being deposited on glasses and cutlery.
- The total demineralization filter treats the water before it feeds into the dishwasher, providing purified water for good rinsing results and long lasting dishwasher components.

Optional Accessories

- Flow meter for demineralization filter PNC 864468
