**232313 (SM6P200F)**

Promix 200 l, with feet including lid, food sensor, automatic water filling and level control. H=600

### Short Form Specification

#### Item No.

AISI 304 stainless steel construction; deep drawn pan with rounded edges manufactured from AISI 316 stainless steel. Pan can be tilted beyond 90° to completely empty the food. Motorised tilting with tilting axis located at the front of the pan to keep the pouring lip high and allow tall vessels to be filled. Food is uniformly heated via the base and the side walls of the pan by an indirect heating system using integrally generated saturated steam at a temperature of 120°C in a jacket with an automatic deaeration system. Safety valve avoids overpressure of the steam in the jacket. Safety thermostat protects against low water level. Max pressure at 1,5 bar. Programmable water filling system. High flow propeller mixes at speeds up to 170 rpm (100-150 litres) and up to 140 rpm (200-300 litres). Continuous rotating in one direction for easier use. Step program facilitates removal of food. High thermal input and fast heat up. Electronic SMART control with possibility to store 50 programs; error message facility; display with: cooking time and temperature, water filling. Heavy duty balanced stainless steel lid, easy to remove and turn to facilitate cleaning. The insulation allows a lower temperature on the outer panels. The foamed thermal insulation guarantees a cool upper edge of the cooking vessel surface. IPX5 water protection. For freestanding installation one left column is necessary for each unit. 600mm tilting height. Including automatic water filling, food sensor and level control. Equipped with feet for better hygiene, flexibility and versatility.

### Main Features

- 600 mm tilting height minimum.
- Equipped with feet for better hygiene, flexibility and versatility.
- Automatic water filling makes possible to preset the desired quantity of water.
- Food sensor, placed on the bottom of the vessel, provides efficient temperature control even with small amounts of food. Can be connected to HACCP integrated system.
- Food is uniformly heated through the base and side walls of the pan by an indirect heating system which uses integrally generated saturated steam at a temperature of 120°C in a jacket with an automatic deaeration system.
- Fast working thanks to the high efficient heating technology and well insulation that keeps the heat inside the well.
- Electronic control with possibility to store up to 50 programs, large display for easy use and a complete control over the following functions: start, cooking time, temperature, water filling and mixing speed.
- Curved pan base guarantees that the appliance is also suitable to prepare small quantities of food.
- Constructed to meet the highest hygiene standards.
- Compliant to CE requirements for safety.
- Safe thanks to the higher water protection IPX5 and the lower temperature outside the panels.
- Isolated upper well rim avoids risk of harm for the user.
- High thermal input and fast heat up.
- Level control: maximizes heating elements lifetime, avoids jacket water manual filling.
- Safety thermostat protects against low water level.
- Safety valve avoids overpressure of the steam in the jacket.
- OPTIONS (to be ordered with the machine and must be installed in the factory):
  - Automatic cooling - allows cooling down of the food connecting the jacket to the tap network
  - Spray gun - integrated spray unit

### Construction

- Ergonomic and user friendly thanks to the high tilting position and the pouring lip design which allow to easily fill containers.
- Heavy duty, balanced stainless steel lid with sliding plastic cover to insert ingredients. Easy to remove and turn to facilitate cleaning.
- Tilting axis located at the front and upper position of the pan to keep the pouring path short when filling different types of vessels.
- Vessel can be tilted beyond 90° to completely empty the food.
- Motorised tilting.
- Max pressure 1,5 bar.
- AISI 304 stainless steel construction with AISI 316 stainless steel deep drawn pan with rounded edges.

## High Productivity Cooking Promix Electric Boiling Pan with Stirrer 200lt, 600mm tilting height, with feet

- Variable speed agitator moves at up to 170 rpm (for 100 to 150 liters) and up to 140 rpm (for 200 to 300 liters) and is strong and fast enough to mix even compact food, such as mashed potatoes.

### Sustainability

- High-quality thermal insulation of the pan saves energy and keeps operating ambient temperature low.

### Electric

Supply voltage: 400 V/3N ph/50 Hz  
 Electrical power, max: 41.5 kW

### Installation:

Distance back floor tilted: 620 mm

### Key Information:

Working Temperature MIN: 30 °C  
 Working Temperature MAX: 121 °C  
 Vessel (round) diameter: 742 mm  
 Vessel (round) depth: 555 mm  
 External dimensions, Width: 1305 mm  
 External dimensions, Depth: 1070 mm  
 External dimensions, Height: 1050 mm  
 Net vessel useful capacity: 200 lt  
 Tilting mechanism: Automatic  
 Bearing: Front
