 Elektro-Kochkessel, 60 l,
 indirekte Beheizung,
 Druckschalter,

Hauptmerkmale

- Kettle is suitable to cook, sauté or poach all kinds of produce.
- Produce is uniformly heated in the base and side walls of the kettle by an indirect heating system that uses integrally generated saturated steam at a temperature of 110° C in the jacket.
- Pressed cooking vessel and lid in 316 AISI Stainless steel.
- Unit to feature high efficiency heating elements (9.4 kW) with energy control and temperature limiter.
- External valve allows to manually evacuate excess air accumulated in the jacket during heating phase.
- Appliance is IPX4 water resistance certified.
- Solenoid valve to refill with hot and cold water.
- Safety valve avoids overpressure of the steam in the jacket.
- No overshooting of cooking temperatures, fast reaction.
- Large capacity drain tap enables precise portioning of the discharged food, especially small quantities.
- Firmly fitting cover to reduce cooking time and save energy costs.
- Ergonomic: unique ratio vessel diameter and height; depth facilitates stirring and gentle food handling.
- Discharge tube and tap are very easy to clean from outside.
- Smooth large surfaces, easy access for cleaning.
- Pressure switch control monitors energy and water consumption.
- Exterior panels in Stainless Steel with Scotch Brite finish.
- One piece pressed 1.5 mm work top in Stainless steel.
- Model has right-angled side edges to allow flush fitting joints between units, eliminating gaps and possible dirt traps.
- Unit delivered with four 50 mm legs in stainless steel as standard (all round Stainless steel kick plates as option).

Konstruktion

- Einteilige tiefgezogene 1,5 mm dicke Deckplatte aus Edelstahl.
- IPx4-Wasserschutz.
- Die Tanks sind aus zwei Teilen geschweißt: Der Seitenmantel besteht aus AISI 304, der Boden aus AISI 316L und die Deckel aus AISI 304.

Nachhaltigkeit

- Geschlossenes Heizsystem - keine Energieverschwendung
- Festsitzender Deckel reduziert die Kochzeit und spart Energiekosten.
- Druckschalterregelung überwacht den Verbrauch von Energie und Wasser.
