

# GH3 BLACK WITH BACKLIT FRONTAL PANEL

**Ref: 563130  
(GH3NEW)**

GH3 NEW STD SPM BLACK

## General Features

Compact, lightweight, and designed for dispensing hot beverages, the GH3 is the ideal dispenser for all types of water-soluble preparations: barley, ginseng, chocolate, tea, herbal teas, infusions, and much more.

With the new GH3, you can now dispense three different flavors in the same footprint as the two-flavor equipment. The GH3 offers two dispensing options: large cup and small cup. Design and functionality are the highlights of this equipment.

**DESIGN:** The backlit front panel gives the GH3 a striking and modern look, and it can be customized with bespoke graphics (subject to negotiation). The lighting effect of the front panel attracts attention and enhances the equipment's appeal, maximizing impulse purchases.

**FUNCTIONALITY:** The GH3 is designed to make the operator's job easier with fully removable powder containers and a sliding door that facilitates filling the water tank. The GH3 features an internal anti-scale filter with a lifespan of 900 liters and an internal device that absorbs steam to protect the soluble products inside the container from humidity. Additionally, this hot beverage dispenser is equipped with a diagnostic system that alerts when the water tank reaches the minimum level and needs refilling, and when the dispensers need cleaning, which can be activated with a simple button to ensure optimal dispensing at all times.

# GH3 BLACK WITH BACKLIT FRONTAL PANEL
