100-lt gas tilting braising pan
with Duomat cooking surface,
thermostatic control,
(Watermark & AGA) - Australia

Short Form Specification

Item No. _____

Suitable for natural gas or LPG. Burners in AISI 441 with flame failure device. Duomat cooking surface for roasting, browning, stewing, preparation of sauces, sautéing, boiling and braising. Can be installed on cantilever systems. Installation on wheels is not available. Includes mechanism to manually tilt the pan and double-skinned lid in stainless steel. Cooking temperature can be set through thermostat and the energy input through an energy regulator. Exterior panels of unit in stainless steel with Scotch Brite finish. Right-angled side edges to allow flush-fitting junction between units.

Main Features

- Actual cooking temperature setting through adjustable thermostat.
- Manual tilting mechanism to facilitate pan emptying.
- Smooth large surfaces, easy access for cleaning.
- Double-skin well and lid to reduce heat dispersion.
- Lid is double-lined, insulated in 20/10 Stainless steel.
- Energy input controlled by energy regulator.
- The special design of the control knob system guarantees against water infiltration.
- Bratt pan ideal for sautéing, poaching, steaming, boiling, stewing and damp cooking.
- Duomat cooking surface allows to perform wet and dry cooking alternatively.
- Working temperature can be set from 80 °C to 300 °C.

Construction

- All pan internal surfaces round and polished for better hygiene.
- All exterior panels in Stainless Steel with Scotch Brite finishing.
- Model has right-angled side edges to allow flush fitting joints between units, eliminating gaps and possible dirt traps.
- Burners in AISI 441 against corrosion and thanks to a high strength yield, are resistant to high temperature.
- Burners in chrome plated steel with flame failure device, optimized combustion and piezo ignition with electronic flame control.
- Cooking surface with **Duomat** bottom: a 10 mm-thick alloy obtained from the combination of 2 different stainless steels for better thermal stability and corrosion resistance.
- IPX5 water resistance certification.
- Usable capacity of the well 85 liters.

Sustainability

- Heat-insulated: limited heat radiation and low energy consumption.
