Main Features

- Electrovalve with probe prevents heating when there is no water in the well.
- Simple and functional control panel equipped with transparent plexiglass cover for additional protection.
- · Steam flow controlled through ball valve.
- ON/OFF switch with indicator light to show machine is on.
- Automatic ignition integrated in the electronic board.
- Safety valve and flame failure device to cut off the gas flow if the pilot light is accidentally extinguished.
- Automatic water filling and automatic water topping up by electovalves and electronic switchboard.
- Elevating baskets automatically tilted at the end of the cooking cycle by an electro mechanic linear activator fed at low tension (24 V).
- High productivity cooking machine for pasta, rice and vegetables. Ideal solution for cooking centers, hospitals, schools canteens, deli, hotels. It is also used in the food industry and in production laboratories.

Construction

- Electronic control for end limit of the baskets.
- Steam supply pressure 0.5 bar.
- Controls and safety unit consist of safety valve, depressurising valve and pressure gauge.
- Cooking basket and all other parts in contact with water made from 316 AISI stainless steel.
- Large drainage tap sized 2" with insulated handle positioned on the front of the appliance.
- All gas appliances are supplied for use with natural gas, with LPG conversion jets supplied as standard.
- Heating by stainless steel burners.

Optional Accessories

- Draught diverter, 150 mm diameter PNC 206132
- Matching ring for flue condenser, 150 PNC 206133 mm diameter
